

ALPHA ADVENTIST PRE & PRIMARY SCHOOL OFFICIAL WEBSITE MASTER TEMPLATE

The proposed **Alpha Adventist Pre & Primary School official website** should be developed as a modern, secure and comprehensive digital platform that represents the school's educational mission, Christian identity, academic programmes, technology development, talents, character formation and future direction. The central identity of the website should remain:

Education • Faith • Technology • Talent • Character • Future

An important institutional point must be clearly represented throughout the website: **Alpha Adventist Pre & Primary School is a Seventh-day Adventist educational institution operating within the Western Tanzania Conference of the Seventh-day Adventist Church, Kigoma, Tanzania.** This relationship is supported by the school's documentation, which identifies the institution under the **Western Tanzania Conference of SDA** and records formal school-board governance and activities. The website should therefore not present Alpha as an independent generic private school; its Seventh-day Adventist educational identity and relationship with the Western Tanzania Conference should be visible, appropriately worded and consistently represented.

The website should communicate the philosophy of **holistic Adventist education**, where academic development is integrated with spiritual, physical, social, moral and practical development. Alpha's own reporting reflects this broader approach through spiritual programmes, academic development, staff development and future institutional plans. Consequently, **Faith and Character** should not appear merely as marketing slogans. They should be integrated into the About, School Life, Spiritual Life, Academics and Student Development sections of the website. The platform should serve **five principal audiences: pupils, parents and guardians, teachers, school workers, and members of the community who may participate in future computer training.** Children need a colourful, simple and engaging experience; parents need reliable information and straightforward communication; teachers and workers need professional resources and training opportunities; and the wider community should be able to discover future educational and computer-training programmes. The website therefore needs different user journeys while maintaining one consistent Alpha identity.

For **parents and guardians**, the website should establish trust immediately. They should easily find information concerning academics, admissions, boarding and day arrangements, school programmes, calendars, examinations, school rules, contacts, news and achievements. The available school registration information records learners across **KG I through Standard VII**, including both boarding and day pupils, which supports having dedicated sections for the different levels and school arrangements. For **children**, the website should be friendly rather than institutional or text-heavy. A dedicated **Alpha Kids Zone** can provide computer lessons, typing activities, mathematics and science exercises, reading resources, quizzes, creative activities and internet-safety education. Large photographs, icons, simple language and age-appropriate interactive content should be used while avoiding excessive animation, advertising and unsafe external links.

Computer and Digital Learning should become one of Alpha's major distinguishing programmes. Computer education should support Alpha pupils from basic computer operation and typing through Microsoft Office, internet skills, digital safety, file management, creative technology and introductory coding. The programme can also provide ICT development for **teachers and school workers**, improving digital teaching, administration, records management, communication and cybersecurity awareness. The same digital-learning programme can progressively develop into an **Alpha Computer Training Centre**. Training for outsiders should initially be presented as **“Coming Soon”** until formally launched. Future participants could include parents, youth, school leavers, job seekers, businesspeople, teachers from other schools, workers and other community members. Proposed courses could include Computer Fundamentals, Microsoft Word, Excel, PowerPoint, Internet & Email, Digital Office Skills, Cyber Safety and introductory coding. Successful participants could receive an authorised **Certificate of Completion**,

supported later by secure online certificate verification. The website should also showcase **talent development and school life**. Dedicated content should cover music, choir, sports, art, drama, public speaking, leadership, ICT activities, creativity, educational trips, worship and community service. This is particularly important because the school's identity should demonstrate that Alpha develops the whole learner rather than focusing exclusively on examination performance. The **Faith & Spiritual Life** section deserves special attention because Alpha operates as a Seventh-day Adventist school. It can appropriately communicate worship programmes, Bible learning, prayer, Christian service, choir activities, spiritual development and character formation. The objective should be to show parents how Christian principles influence education, behavior, responsibility and service while maintaining a welcoming presentation for families exploring the school.

The homepage should therefore immediately present **Alpha's pupils, teachers, campus, computer education, faith, academics and talents through real approved photographs and videos**. The visitor should quickly understand: **this is a Seventh-day Adventist school; it provides serious education; it develops character; it embraces technology; it develops children's talents; and parents can trust and communicate with the institution**. The website should also become Alpha's **official communication centre**. News, announcements, school calendars, examinations, graduation, academic achievements, ICT programmes, sports and spiritual events should be published through the website. Facebook, Instagram and YouTube should complement rather than replace it. Social-media posts should increasingly direct parents and community members back to the official Alpha website for complete and authoritative information.

From a technical perspective, the website should be **mobile-first, responsive, fast, accessible, search-engine optimised and secure**. It should contain a content management system allowing authorised staff to manage news, events, galleries, courses, admissions, contacts and announcements. Security controls should include HTTPS, secure administrator authentication, role-based permissions, regular backups, form protection and controlled access to sensitive information. Privacy and **child safeguarding** must be incorporated into the design from the beginning. Approved school information, programmes, statistics, events and authorised media can be public, while individual pupil results, private parent information, staff records, internal board documents, safeguarding information and other sensitive records should remain protected. This separation is particularly important for a school website involving children's information. Development should be progressive. **Phase One** should establish the official public website, academics, Adventist identity, admissions, computer learning, school life, news, gallery and contact services. **Phase Two** can introduce online admissions, computer-course registration, events and certificate management. **Phase Three** can introduce secure Parent, Student and Teacher portals for results, attendance, learning materials, notices and communication. Later phases could support e-learning, online payments, certificate verification, digital libraries and other integrated educational services.

Recommended institutional positioning

The strongest positioning is therefore:

Alpha Adventist Pre & Primary School is a Seventh-day Adventist educational institution within the Western Tanzania Conference – Kigoma, committed to holistic Christian education that develops learners academically, spiritually, socially, creatively and technologically. Through quality education, faith, discipline, character development, talent discovery and digital skills, Alpha prepares children to succeed in school, in society and in the future. The website should ultimately make Alpha recognisable as **a school of Education, a school of Faith, a school of Technology, a school of Talent, a school of Character and a school preparing children for the Future.**

ALPHA ADVENTIST PRE & PRIMARY SCHOOL
A Seventh-day Adventist Educational Institution
Western Tanzania Conference – Kigoma
Education • Faith • Technology • Talent • Character • Future
Where Children Learn, Grow, Believe, Create and Prepare for Tomorrow.

1. MAIN WEBSITE IDENTITY

Official Website Name: ALPHA ADVENTIST PRE & PRIMARY SCHOOL

Suggested Website Message: “Building Knowledge, Character, Faith, and Technology and Talent for a Better Future.”

Alternative short slogan: **Learn • Grow • Believe • Create • Succeed**

2. MAIN NAVIGATION MENU

The official website should use a simple top menu:

Home | About Us | Academics | Admissions | Computer Classes | School Life | Parents | Students | News & Events | Gallery | Contact

Main action buttons: **APPLY FOR ADMISSION**
JOIN COMPUTER CLASS

CONTACT US: On mobile phones, keep three quick-access buttons:
WhatsApp | Call | Apply

3. HOME PAGE

The homepage is the most important page: It should immediately show:

- Who Alpha is
- What the school offers
- Why parents should trust the school
- What children can enjoy
- How to apply
- How to join computer training

The **homepage is the most important page** of the Alpha Adventist Pre & Primary School website because it creates the first impression and should quickly answer the main questions of parents, pupils and visitors. It should clearly show **who Alpha is, what the school offers, why parents should trust the school, what children can enjoy, how to apply for admission, and how to join computer training.**

Alpha should be introduced immediately as a **Seventh-day Adventist educational institution within the Western Tanzania Conference – Kigoma**. The homepage should communicate that Alpha combines **Education, Faith, Technology, Talent, Character and Future preparation**. This institutional identity should appear near the top of the page so visitors understand that Alpha is not just a general primary school, but a Christian school with a clear educational and spiritual foundation. The school's documents confirm the relationship with the Western Tanzania Conference and show that the school formally addresses academics, chaplaincy, registration, calendars, professional growth and other institutional responsibilities.

The homepage should also clearly explain **what Alpha offers**. This should include pre-primary and primary education, Christian and Adventist education, computer and digital learning, boarding and day-school options, talent development, sports, music, choir, creativity, leadership and other school-life activities. These should not be presented as long paragraphs; they should appear as attractive visual cards with short descriptions and real school photographs.

A strong section should explain **why parents should trust Alpha**. Trust should come from real evidence: the school's Christian values, structured academic programmes, formal governance, boarding and day arrangements, teacher development, communication with parents, computer education, student welfare and visible school activities. The available enrolment records show learners across KG I to Standard VII, including both boarding and day pupils, demonstrating that Alpha serves a substantial and organized school community.

The homepage should also show **what children can enjoy at Alpha**. Children should see that school life includes more than classroom lessons. A colorful “Life at Alpha” section can showcase computers, sports, music, choir, art, public speaking, reading, worship, school trips, clubs and creative activities. This makes the website attractive to children while giving parents a clearer picture of holistic child development. The **admissions process** must be extremely easy to find. A clear section such as “**Ready to Join the Alpha Family?**” should show the basic process: discover the school, book a visit, submit an application, complete any required assessment or placement process, and receive admission confirmation. Prominent buttons should include **Apply Now**, **Book a School Visit**, **WhatsApp Admissions**, and **Call Admissions**. Parents should never have to search through several pages before finding out how to apply.

The **Computer Training section** should also be given strong visibility because it is part of Alpha's future growth. The homepage should distinguish between computer learning for Alpha pupils and wider training. Alpha students can learn computer basics, typing, Microsoft Word, Excel, PowerPoint, internet skills, digital safety and introductory coding. Teachers and workers can receive practical ICT training for teaching, administration, records and communication. For the wider community, the homepage should clearly state “**Computer Classes for Everyone – Coming soon**” and provide a **Register Interest** or **Join Waiting List** button.

A dedicated computer-training banner could say: “**Build Your Digital Future with Alpha – Practical Computer Skills for Students, Teachers, Workers and, Coming Soon, the Wider Community.**” Future courses may include Computer Fundamentals, Microsoft Word, Excel, PowerPoint, Internet & Email, Digital Office Skills, Cyber Safety and Coding Fundamentals. Successful participants in approved programmes can receive a Certificate of Completion.

The recommended homepage flow is: **Top Contact Bar → Navigation → Hero Section → Quick Trust Indicators → Who Alpha Is → Six Alpha Pillars → What Alpha Offers → Why Parents Trust Alpha → Life at Alpha → Computer & Digital Learning → Public Computer Training → News & Events → Gallery → Admissions → Parent Corner → Kids Zone → Contact → Footer**. This flow is effective because it first establishes identity, then builds trust, then demonstrates value, and finally guides visitors toward action.

The main homepage message should therefore be simple and strong:

Alpha Adventist Pre & Primary School is a Seventh-day Adventist educational institution within the Western Tanzania Conference – Kigoma, providing holistic education that combines academics, Christian faith, technology, and character and talent development to prepare children for the future.

4. HERO SECTION

Use a large, attractive photograph or slideshow showing:

- Happy Alpha pupils
- Teachers and pupils in class
- Computer laboratory

- School campus
- Graduation
- Sports
- Talent activities
- Worship or character-development activities

Main Heading: Welcome to Alpha Adventist Pre & Primary School

4. HERO SECTION — PROFESSIONAL WEBSITE CONTENT AND DESIGN SPECIFICATION

The **Hero Section** is the first major visual area visitors see when they open the Alpha Adventist Pre & Primary School website. It should immediately communicate the school's identity, environment, educational quality, Christian values and modern learning direction. Because first impressions strongly influence whether a parent continues exploring the website, the Hero Section must be visually strong, emotionally warm, professionally designed and based primarily on **real Alpha school photographs**.

The Hero Section should use either **one powerful full-width photograph** or a carefully controlled slideshow of three to four images. The purpose is not to show as many pictures as possible, but to communicate Alpha's strongest qualities in a few seconds. The visual presentation should reflect the school as a **Seventh-day Adventist educational institution within the Western Tanzania Conference – Kigoma**, while remaining welcoming to all families.

Recommended Main Hero Message: Welcome to Alpha Adventist Pre & Primary School Education • Faith • Technology • Talent • Character • Future: A Seventh-day Adventist educational institution within the Western Tanzania Conference – Kigoma, committed to developing knowledgeable, disciplined, creative, responsible and spiritually grounded learners.

Primary buttons: **APPLY FOR ADMISSION**
BOOK A SCHOOL VISIT

Secondary buttons: **EXPLORE ALPHA**
JOIN COMPUTER TRAINING

A. HAPPY ALPHA PUPILS

The strongest Hero image should show **real Alpha pupils who appear happy, confident, engaged and comfortable within the school environment**. The photograph should preferably show pupils:

- Walking together on the school campus
- Participating in a class or activity
- Smiling naturally
- Wearing the approved school uniform
- Interacting positively with teachers or classmates

The purpose is to help parents immediately see that Alpha is a place where children feel welcomed, supported and engaged. The image should avoid appearing staged or artificial. Natural school-life photographs are usually more trustworthy than heavily posed promotional photographs.

Suggested Message: A Place Where Every Child Can Learn, Grow and Belong

Supporting text: **At Alpha, every learner is encouraged to develop confidence, knowledge, Responsibility and strong Christian character in a caring school community.**

B. TEACHERS AND PUPILS IN CLASS

A second major visual should demonstrate the **academic environment**.

The photograph should show:

- A teacher actively teaching
- Pupils participating
- Classroom materials
- Books or learning aids
- A well-organized classroom
- Positive teacher–pupil interaction

This image should communicate that Alpha is not only a beautiful school but also a serious educational institution.

Suggested Heading: Quality Teaching. Active Learning. Strong Foundations.

Supporting message: **Our teachers support learners through structured lessons, practical activities, guidance and continuous development.** This section reinforces the **Education** pillar of the Alpha brand.

C. COMPUTER LABORATORY

The Computer Laboratory image should be given strong prominence because technology is one of the school's strategic differentiators. Use photographs showing:

- Alpha pupils using computers
- Teacher guiding learners
- Computer laboratory equipment
- Pupils typing or working on educational activities
- Smart board use if available
- Safe and organized ICT learning

The image should demonstrate real computer use rather than pupils simply sitting beside machines.

Suggested Heading

Preparing Learners for the Digital Future

Supporting message: **Alpha introduces pupils to practical computer skills, digital creativity, safe technology use and foundational ICT knowledge for modern education and future opportunities.**

CTA: EXPLORE COMPUTER LEARNING

The Computer Laboratory slide should also help introduce the future public computer-training programmed.

D. SCHOOL CAMPUS

The campus photograph should communicate **safety, order, cleanliness and institutional credibility**. Recommended views include:

- Main school entrance
- School buildings
- Gardens
- Playground

- Class blocks
- Assembly areas
- Computer laboratory building
- Boarding facilities, if approved for public promotion

The campus image helps parents understand that Alpha is a real, established institution with physical infrastructure and an organized learning environment.

Suggested Heading: A Safe and Supportive Environment for Learning

Supporting text: **Our school environment is designed to support academic learning, discipline, friendship, creativity and healthy development.** Avoid displaying areas that are under construction or poorly maintained unless the purpose is specifically to show an approved development project.

E. GRADUATION

Graduation is one of the strongest visual expressions of achievement and school continuity. The Hero or secondary homepage section may show:

- Graduating pupils
- Graduation procession
- Certificates
- Academic gowns if used
- Teachers and graduating pupils
- Parents celebrating
- School leadership

The image should show genuine Alpha events.

Suggested Heading: Celebrating Achievement and Progress

Supporting message: **Every stage of learning is part of preparing our pupils for the next chapter of education and life.** Graduation content strengthens the school's credibility because it demonstrates progression and completion.

F. SPORTS

Sports photographs should communicate energy, teamwork and physical development.

Use images showing:

- Football
- Athletics
- Games
- Team activities
- Physical education
- School competitions

Sports should be presented as part of holistic education rather than merely recreation.

Suggested Heading: Growing Strong Through Teamwork and Activity

Supporting message: **Sports and physical activities help our pupils develop fitness, teamwork, confidence, discipline and leadership.** This supports the physical-development component of holistic education.

G. TALENT ACTIVITIES

Talent images can create some of the most attractive content on the website.

Possible activities include:

- Singing
- Choir

- Drama
- Poetry
- Art
- Public speaking
- Creative projects
- ICT competitions
- Music
- Leadership activities

Suggested Heading: Every Child Has a Talent worth Developing

Supporting message: **Alpha encourages pupils to discover and develop their abilities through music, arts, technology, leadership, communication and creative activities.**

This directly communicates the **Talent** pillar. Where the school already has approved social-media videos of talent activities, the Hero section can link to: **WATCH OUR TALENTS**

H. WORSHIP AND CHARACTER-DEVELOPMENT ACTIVITIES

Because Alpha is a Seventh-day Adventist institution, the Hero visuals should include appropriate representation of **faith and character development**. Suitable images could show:

- School worship
- Prayer
- Bible learning
- Choir
- Chapel activity
- Christian service
- Character-development programmed

The purpose should not be to make the site appear exclusively religious; rather, it should show how Christian values are integrated naturally into school life.

Suggested Heading: Growing in Faith and Character

Supporting message: **Christian values guide our approach to integrity, discipline, respect, responsibility, compassion and service.** This section is important because it makes the **Faith** and **Character** pillars real rather than merely decorative slogans.

RECOMMENDED HERO SLIDESHOW STRUCTURE

For good performance and user experience, I recommend a maximum of **four Hero slides**.

Slide 1 — School Identity

Image: Happy Alpha pupils on campus

Heading: **Welcome to Alpha Adventist Pre & Primary School**

Supporting Message: **Education • Faith • Technology • Talent • Character • Future**

Buttons: **APPLY NOW | BOOK A VISIT**

Slide 2 — Academic Excellence

Image: Teacher and pupils in classroom

Heading: **Strong Academic Foundations for Every Learner**

Supporting Message: **Learning that develops knowledge, confidence, discipline and curiosity.**

Button: **EXPLORE ACADEMICS**

Slide 3 — Technology

Image: Computer Laboratory

Heading: **Preparing Children for the Digital Future**

Supporting Message: Practical computer learning, digital creativity and responsible technology use.
Button: **COMPUTER LEARNING**

Slide 4 — Faith, Talent and School Life

Image: Worship, choir, sport or talent activity

Heading: Developing the Whole Child

Supporting Message: Faith, character, talent, creativity, teamwork and leadership are part of the Alpha experience.

Button: **DISCOVER SCHOOL LIFE**

TECHNICAL REQUIREMENTS FOR THE DEVELOPER

The Hero Section should be designed with usability and performance in mind.

Recommended specifications include:

- Full-width responsive design
- Desktop height around 600–750 px
- Mobile height around 500–650 px
- High-quality but compressed images
- WebP or AVIF formats where possible
- Lazy loading for non-first slides
- Text overlay with strong contrast
- Dark or light overlay depending on the photo
- Clear CTA buttons
- No automatic sound
- No excessive animation
- Swipe support on mobile
- Pause controls if slideshow auto-rotates
- Alternative text for accessibility
- Correct image cropping for desktop, tablet and mobile

The first Hero image should be loaded quickly because it affects both visitor experience and website performance.

PHOTOGRAPHY QUALITY STANDARD

All Hero photographs should meet a professional standard. Use:

- High-resolution images
- Natural lighting where possible
- Clean backgrounds
- Correct school uniforms
- Genuine activities
- Good composition
- Diverse representation of school life

Avoid:

- Blurry images
- Screenshots from social media
- Watermarked photographs
- Strong filters
- Artificial stock images
- Images containing unnecessary private information

The developer should never stretch a small image to fill the entire Hero area because this will make the website look unprofessional.

CHILD SAFEGUARDING AND MEDIA USE

Because Hero photographs can prominently display children, the school should maintain a clear process for approving pupil images for website and social-media publication. Only authorized images should be used. Avoid displaying:

- Full personal information with photographs
- Sensitive student records
- Medical information
- Individual academic results
- Private contact information

Image captions should normally describe the activity rather than expose unnecessary details about individual pupils.

WHY THIS HERO SECTION IS IMPORTANT

The Hero Section is justified because it communicates Alpha's full educational identity much faster than a long introduction. A parent can immediately see: **real pupils + real teachers + real campus + real learning + real technology + real faith + real talent.**

This combination creates stronger trust than marketing statements alone. The Hero Section should therefore represent the six Alpha pillars visually:

Pupils and classrooms = EDUCATION

Worship and Christian activities = FAITH

Computer laboratory = TECHNOLOGY

Music, sports and creativity = TALENT

Positive behaviour and service = CHARACTER

Graduation and digital learning = FUTURE

This gives the website a coherent story instead of simply rotating unrelated school photographs.

Final Hero Positioning

ALPHA ADVENTIST PRE & PRIMARY SCHOOL

A Seventh-day Adventist Educational Institution within the Western Tanzania Conference

– Kigoma: Education • Faith • Technology • Talent • Character • Future

Where Children Learn, Grow, Believe, Create and Prepare for Tomorrow.

Supporting Message: Quality Education, Christian Values, Technology Skills, Discipline and Talent Development for Every Child. Alpha Adventist Pre & Primary School provides a caring and inspiring environment where learners develop academically, spiritually, socially, creatively and technologically.

Join Computer Classes

5. QUICK FEATURES SECTION

Professional Website Content & Developer Specification

The **Quick Features Section** should appear immediately after the Hero Section or the short introductory/trust section of the Alpha Adventist Pre & Primary School homepage. Its purpose is to answer one important question quickly:

“What makes Alpha a strong environment for my child's education and development?”

Rather than presenting visitors with long paragraphs, the section should use **six visually attractive, clickable feature cards** representing the core educational strengths of Alpha:

Quality Education • Christian Values • Computer & Digital Learning • Talent Development • Safe Learning Environment • Dedicated Teachers

Together, these cards should give parents an immediate overview of the school's educational approach while giving children a colourful and welcoming introduction to life at Alpha.

Recommended Section Introduction

Why Choose Alpha?

Building the Whole Child for Today and Tomorrow

At **Alpha Adventist Pre & Primary School**, education goes beyond classroom instruction. As a **Seventh-day Adventist educational institution within the Western Tanzania Conference – Kigoma**, Alpha seeks to support the academic, spiritual, social, physical and personal development of every learner. Our approach brings together **quality education, Christian values, technology, talent development, a supportive learning environment and committed teachers** to help children build strong foundations for the future. The developer should then display the following six cards.

1. QUALITY EDUCATION

Building Strong Academic Foundations

Recommended Website Content

At Alpha Adventist Pre & Primary School, we aim to provide structured and purposeful learning that helps pupils build strong academic foundations while developing curiosity, confidence and a positive attitude toward learning. Learning should progressively develop pupils' knowledge and abilities across the appropriate curriculum areas while encouraging understanding, participation, practical application and continuous improvement. Our educational approach should support children in developing:

- Literacy and communication
- Numeracy and mathematical thinking
- Scientific understanding
- Language development
- Critical thinking
- Creativity
- Problem-solving
- Independent learning
- Practical skills
- Confidence in learning

Parent-Focused Message

Parents should understand that Alpha is committed not simply to preparing pupils for examinations, but to helping children develop knowledge and learning habits that will support their future education.

Suggested Card Text: Structured learning that develops strong academic foundations, confidence, curiosity and lifelong learning skills.

Suggested CTA: Explore Academics → The card should link to: </academics>

2. CHRISTIAN VALUES

Education Guided by Faith and Character

This feature is especially important because it differentiates Alpha's institutional identity.

Recommended Website Content

As a **Seventh-day Adventist educational institution within the Western Tanzania Conference – Kigoma**, Alpha integrates Christian principles into the educational experience. Faith should not appear on the website simply as a religious label. The content should explain how Christian education contributes to children's everyday development.

The school seeks to encourage values such as:

- Faith in God
- Honesty
- Integrity
- Respect
- Discipline
- Responsibility
- Compassion
- Service
- Cooperation
- Good citizenship

Christian values should be reflected through worship, Bible learning, prayer, character-development activities, positive relationships and responsible behavior.

Parent-Focused Message: The purpose is to reassure parents that Alpha is concerned with **who the child becomes**, not only the marks the child obtains.

Suggested Card Text: Christian education that encourages faith, integrity, respect, discipline, responsibility, compassion and service.

Suggested CTA: Discover Faith & Character → Link to: </faith-and-character>

3. COMPUTER & DIGITAL LEARNING

Preparing Learners for the Digital Future

This should be one of the most visually distinctive cards because technology is intended to become an important part of Alpha's educational direction. **Recommended Website Content**

Alpha recognises that today's children are growing up in an increasingly digital world. Computer education should therefore help learners become **confident, creative, responsible and safe users of technology**. Depending on age and learning level, pupils can progressively develop skills in:

- Computer fundamentals
- Identification of computer parts
- Keyboard and mouse operation
- Typing
- File and folder management
- Word processing
- Presentations
- Spreadsheet fundamentals
- Digital drawing and creativity
- Internet awareness
- Online research
- Digital safety
- Responsible technology use
- Introductory coding and computational thinking

The programme should emphasise **practical computer use**, not theory alone.

Parent-Focused Message: Parents should understand that Alpha intends to prepare children for both their present education and a future in which digital competence will be increasingly important.

Suggested Card Text: Practical computer and digital learning that develops confidence, creativity, responsible technology use and future-ready skills.

Suggested CTA: Explore Digital Learning → Link to: [m/computer-learning](#)

4. TALENT DEVELOPMENT

Every Child Has Potential

Academic ability is only one part of a child's development. Alpha should use this feature to demonstrate its commitment to identifying and encouraging individual abilities.

Recommended Website Content

Alpha believes that children have different abilities, interests and strengths. The school should provide opportunities for pupils to explore and develop talents alongside their academic education. Talent-development activities may include approved programmes in:

- Music, Choir, Sports, Art, Drama, Poetry, Public speaking, Creative writing, Leadership, Technology, Digital creativity, Innovation, School competitions, other extracurricular activities

The exact activities displayed publicly should reflect programmes that Alpha actually provides.

Parent-Focused Message: Parents should see that children are given opportunities to develop **confidence, creativity, communication, teamwork and leadership**, not only academic performance.

Child-Focused Message: This card should make a child think: “There is something at Alpha that I can enjoy and become good at.”

Suggested Card Text: Opportunities for children to discover and develop their abilities through music, sports, creativity, communication, technology and other activities.

Suggested CTA: Discover Talents → Link to: [/talent](#)

5. SAFE LEARNING ENVIRONMENT

A Supportive Environment for Learning and Growth

Safety is one of the most important considerations for parents choosing a school. However, the website should avoid unsupported absolute claims such as: “**100% Safe School**” or “**Completely Risk-Free Environment.**” Instead, communicate the school's commitment to creating an organized, supportive and child-friendly learning environment.

Recommended Website Content

Alpha seeks to provide an environment where children can learn, interact and develop within appropriate school rules, supervision and positive relationships.

The school environment should promote:

- Appropriate discipline, Respect between pupils and staff, Responsible behavior, Cleanliness, Order, Supervision, Child welfare, Positive relationships, Appropriate use of school facilities, Responsible technology use, Reporting of concerns

Where Alpha has formal safeguarding, health, boarding, emergency or child-protection procedures, those can be explained on dedicated pages after management approval.

Parent-Focused Message: Parents should understand that the school takes **student welfare, discipline and responsible supervision seriously**.

Suggested Card Text: A disciplined, supportive and child-friendly environment designed to help learners feel respected, responsible and ready to learn.

Suggested CTA: Learn About Student Life → Link to: `/student-life` or: `/student-welfare`

6. DEDICATED TEACHERS

Teaching with Knowledge, Care and Commitment

Teachers are among the strongest factors shaping the parent and pupil experience. This feature should therefore humanize Alpha rather than simply saying that the school has “qualified teachers.”

Recommended Website Content

Alpha's teachers should be presented as educators responsible for guiding pupils academically while supporting character, confidence, discipline and personal development.

Teachers contribute through:

- Lesson preparation, Classroom instruction, Assessment, Academic guidance, Learner support, Classroom management, Character development, Communication, Talent identification, Professional development, Appropriate use of technology in education

The school's governance materials also show formal attention to professional growth and academic responsibilities, supporting the importance of presenting staff development as part of Alpha's institutional approach.

Parent-Focused Message: The parent should see teachers as **partners in the child's development**, rather than simply employees delivering lessons.

Suggested Card Text: Teachers committed to guiding learners through professional instruction, encouragement, discipline, care and continuous development.

Suggested CTA: Meet Our Teachers → Link to: `/our-team`

Recommended Six-Card Website Copy

For the homepage itself, the developer should use shorter copy than the detailed descriptions above.

Feature	Homepage Text
Quality Education	Structured learning that develops strong academic foundations, confidence, curiosity and lifelong learning skills.
Christian Values	Christian education that promotes faith, integrity, respect, discipline, responsibility and service.
Computer & Digital Learning	Practical digital learning that prepares pupils to use technology confidently, creatively, responsibly and safely.
Talent Development	Opportunities for children to discover and develop talents through creativity, music, sports, communication and technology.
Safe Learning Environment	A disciplined, supportive and child-friendly environment that encourages learning, responsibility and positive relationships.
Dedicated Teachers	Teachers committed to guiding learners through quality instruction, encouragement, care and professional responsibility.

The longer content should live on the corresponding internal pages.

Visual Design for the Six Cards: The six cards should appear as a **3 × 2 grid on desktop**, **2 × 3 on tablets where space permits**, and **one card per row or a carefully designed two-column arrangement on mobile**. Each card should contain: **Icon** → **Feature Title** → **Short Description** → **Learn More** For example: **Computer & Digital Learning** Practical digital learning that prepares pupils to use technology confidently, creatively and responsibly. **Explore Digital Learning** → Each card should be clickable, not only the small text link.

Colour and Visual Treatment

The developer should avoid giving every card a completely unrelated bright color because this can make the official school website look like a children's game. Instead, use Alpha's approved brand palette with controlled variation. For example:

Quality Education — school blue

Christian Values — warm gold/accent

Computer Learning — blue/technology accent

Talent Development — creative secondary accent

Safe Environment — green

Dedicated Teachers — primary institutional colour

Exact colours should be derived from the **official Alpha branding/logo**, not invented during development.

Photography Alternative

An even stronger design can combine each card with a small real photograph. For example:

Quality Education: Teacher teaching Alpha pupils.

Christian Values: Approved worship or Bible-learning activity.

Computer Learning: Alpha pupils in the computer laboratory.

Talent Development: Choir, sport, art or public-speaking activity.

Safe Environment: Organised school/campus activity.

Dedicated Teachers: Teacher interacting positively with pupils.

This creates stronger credibility because the website **shows the programme instead of only claiming it exists**.

Mobile Experience: On smartphones, the section should begin:

Why Choose Alpha?

Discover what makes learning and growing at Alpha a complete educational experience.

Then display cards vertically. Each card should have:

- Large icon
- Short heading
- Maximum 2–3 lines of homepage text
- Large touch area
- Clear link

Avoid forcing parents to read the full expanded descriptions on the homepage.

Connection to the Six Alpha Pillars: The Quick Features should also reinforce the main institutional positioning: **Education • Faith • Technology • Talent • Character • Future**

The relationship can be understood as:

Quality Education → **EDUCATION**

Christian Values → **FAITH + CHARACTER**

Computer & Digital Learning → **TECHNOLOGY + FUTURE**

Talent Development → **TALENT + FUTURE**

Safe Learning Environment → **CHARACTER + DEVELOPMENT**

Dedicated Teachers → **EDUCATION + CHARACTER**

This creates consistency between Alpha's slogan and the actual services shown on the website.

Developer Content Rule: Do Not Overclaim

This is particularly important for producing a **true and credible official website**.

Statements such as:

“We are the best school in Kigoma.”

“We guarantee academic success.”

“We have the most advanced computer laboratory.”

“100% safe school.”

should not be published unless there is reliable evidence supporting them. Instead, use accurate institutional language such as:

“We are committed to...”

“Our programme provides...”

“Learners are given opportunities to...”

“The school promotes...”

This makes the website more professional and defensible.

Why This Section Is Justified

The Quick Features Section acts as the bridge between the emotional impact of the **Hero Section** and the detailed information elsewhere on the website. The Hero says: **“Welcome to Alpha.”**

The Quick Features then answer: **“This is what Alpha stands for and what your child can experience here.”** Parents can understand the school's main strengths in approximately **20–30 seconds**, while visitors who need more information can open the corresponding pages.

Most importantly, the six cards should not function as six isolated marketing claims. Together they tell one coherent Alpha story:

At Alpha Adventist Pre & Primary School, children receive structured education within a Seventh-day Adventist learning environment that promotes Christian character, develops digital skills and individual talents, provides a supportive environment, and is guided by teachers committed to children's learning and development.

Recommended Section Closing

Building the Whole Child: Education • Faith • Technology • Talent • Character • Future

6. ABOUT ALPHA

Professional Website Content Based on Alpha School Documents

The **About Alpha** section should present the school's real institutional identity, not generic school marketing language. Based on the supplied Alpha documents, the school is formally identified under the **Western Tanzania Conference of the Seventh-day Adventist Church** and its board structure includes academic, chaplaincy, registration, professional-growth and other institutional responsibilities. The school's own mission/vision page states that Alpha exists to offer **holistic education**, with a philosophy centred on harmonious development of the **physical, mental, social and spiritual dimensions of life**.

Recommended Website Heading

Who We Are

Alpha Adventist Pre & Primary School is a Seventh-day Adventist educational institution within the Western Tanzania Conference – Kigoma, committed to holistic Christian education and the development of the whole learner. Our educational approach recognises that a child's growth should not be limited to academic achievement alone. Alpha seeks to nurture the learner intellectually, spiritually, socially, physically and morally while preparing

pupils to become responsible members of society and to grow in Christian faith. The school therefore seeks to develop learners in areas such as:

- **Mind** — knowledge, understanding, reasoning and academic growth.
- **Character** — integrity, discipline, responsibility and positive behaviour.
- **Faith** — spiritual growth, Christian values and relationship with God.
- **Creativity** — imagination, innovation and expression.
- **Confidence** — communication, participation and self-belief.
- **Discipline** — responsibility, order and respect for school expectations.
- **Leadership** — initiative, service and responsible decision-making.
- **Digital Capability** — practical computer and technology skills.
- **Social Responsibility** — cooperation, service, respect and responsible citizenship.

The school's learning model should therefore be presented as a combination of **academic learning, Adventist Christian values, practical education, technology, character formation, talent development and preparation for future life**. For website purposes, the developer should accompany this section with real Alpha photographs showing classroom learning, worship, computer education, sports, talent activities and campus life. This will visually demonstrate the meaning of "holistic education."

7. OUR VISION

There is an important correction to the earlier draft. The supplied Alpha school document gives the existing vision as: **"To be a model school in the nation of Tanzania and beyond the obvious as entrusted by God."** Because this comes directly from Alpha's institutional material, it should be treated as the **official source wording** unless the School Board or Western Tanzania Conference formally approves a revised version.

Recommended Website Presentation

Our Vision: To be a model school in the nation of Tanzania and beyond the obvious as entrusted by God.

Website Explanation

Alpha's vision expresses the school's aspiration to become an educational institution recognised for excellence, Christian character and holistic development while fulfilling the responsibility entrusted to it by God. For the public website, the official statement can be followed by a short explanatory paragraph:

We aspire to build a school community where academic excellence, Christian faith, character development, creativity, technology and responsible citizenship work together to prepare learners for meaningful futures. This explanatory paragraph modernizes the presentation **without replacing the official vision statement**.

Developer Design

The Vision section could use: **Vision Statement → Short Explanation → Inspiring Alpha Campus/Pupil Photograph** A "Vision" card can also sit beside the Mission and Philosophy cards.

8. OUR MISSION

The current Alpha document gives the school mission as:

"To offer holistic education designated for good citizenry, and eternity."

This should remain the official website mission unless formally changed by the appropriate school authority.

Recommended Website Presentation

Our Mission

To offer holistic education designated for good citizenry, and eternity.

Because the original wording is brief and institutional, the website can add a supporting explanation:

Alpha seeks to educate the whole learner by developing academic ability, Christian faith, responsible character, social awareness, practical skills, creativity and preparation for a life of service. This explanation is consistent with the philosophy contained in the school document but should be identified as **website explanatory content**, not a replacement for the official mission.

What the Mission Means in Practice

For a parent-friendly website, the mission can be demonstrated through four practical dimensions:

Academic Development

Helping learners build strong knowledge, learning skills and academic foundations.

Spiritual Development

Providing Christian education that nurtures faith, worship, service and spiritual growth.

Character & Citizenship

Developing discipline, responsibility, respect, integrity and good citizenship.

Whole-Person Development

Supporting children's physical, mental, social, creative and practical development.

The school's board agenda also reflects the institutional integration of academics and spiritual life through separate academic and chaplaincy reporting, as well as professional growth and special worship programmes.

9. SCHOOL PHILOSOPHY

I recommend adding **Philosophy** between Mission/Vision and Core Values because it is explicitly present in Alpha's official source material. The Alpha document states:

“Wholistic education for harmonious development of the physical, mental, social and spiritual dimensions of life.”

Recommended Website Heading

Our Educational Philosophy

Wholistic education for harmonious development of the physical, mental, social and spiritual dimensions of life.

Website Explanation

This philosophy provides the foundation for Alpha's educational approach. It means that the school should not measure a child only by examination results. Education should also promote physical wellbeing, intellectual growth, positive social relationships, moral responsibility and spiritual development. The website can illustrate this with four visual areas:

Physical → Health, activity, sport and wellbeing

Mental → Academics, thinking, knowledge and creativity

Social → Relationships, teamwork, citizenship and service

Spiritual → Faith, worship, Christian character and values

This gives visitors a much clearer understanding of what Alpha means by **holistic education**.

10. CORE VALUES

The specific list previously proposed — **Faith, Excellence, Discipline, Integrity, Respect, Responsibility, Creativity, Innovation and Service** — is **not explicitly presented in the supplied documents as an official Alpha “Core Values” list.**

Therefore, the website developer should **not label these as officially approved Alpha Core Values until school management or the School Board confirms them.**

The documents do, however, strongly support themes of faith, responsibility, ethical conduct, professional growth, service, spiritual activity and institutional accountability. For example, the board materials include mission statements, chaplaincy, professional growth, worship programmes and formal ethical/conflict-of-interest expectations. **Recommended Proposed Core Values for Management Approval**

Our Core Values

Faith

We recognise God as central to education and encourage learners to grow spiritually through Christian teaching, worship and service.

Excellence

We encourage pupils and staff to pursue high standards in learning, teaching, behaviour and personal development.

Discipline

We promote self-control, responsibility, order and respect for school expectations.

Integrity

We encourage honesty, ethical behavior and doing what is right even when no one is watching.

Respect

We value every member of the school community and encourage respectful relationships among pupils, staff, parents and visitors.

Responsibility

We encourage learners and staff to accept responsibility for their actions, duties and contribution to the school community.

☐ **Creativity**

We create opportunities for learners to think, imagine, express themselves and develop their individual talents.

Innovation

We encourage practical problem-solving, technology use and new ways of learning and creating.

Service

We encourage learners to use their knowledge, talents and abilities to help others and contribute positively to society.

Recommended Final Website Structure

The developer should present these sections in the following sequence:

ABOUT ALPHA

↓

Who We Are

↓

Official Mission

↓

Official Vision

↓

Educational Philosophy

Proposed/Approved Core Values

Education • Faith • Technology • Talent • Character • Future

This structure is stronger because it separates **official institutional statements** from **modern website explanations**.

Important Content Governance Rule

The developer should create editable CMS fields for:

- Mission
- Vision
- Philosophy
- Core Values
- About Alpha
- Institutional affiliation

This allows Alpha to update wording later without redesigning the website.

For accuracy, the initial publication should retain the official source statements exactly as approved by the school, while marketing explanations can be written around them.

Recommended Final “About Alpha” Website Copy

Alpha Adventist Pre & Primary School is a Seventh-day Adventist educational institution within the Western Tanzania Conference – Kigoma. Guided by Christian principles, the school is committed to holistic education that supports the physical, mental, social and spiritual development of every learner. Through academic learning, faith, character development, technology, creativity, talent and responsible citizenship, Alpha seeks to prepare children for meaningful lives of learning, service and responsible participation in society.

Our Mission

To offer holistic education designated for good citizenry, and eternity.

Our Vision

To be a model school in the nation of Tanzania and beyond the obvious as entrusted by God.

Our Philosophy

Wholistic education for harmonious development of the physical, mental, social and spiritual dimensions of life.

The strongest professional approach is therefore **not to replace Alpha’s existing Mission and Vision with newly invented statements**. Instead, the official website should preserve the school's approved institutional wording and use modern, parent-friendly explanatory content around it. This gives the website both authenticity and professional clarity.

10. HEAD TEACHER'S MESSAGE

Professional Website Content Based on Alpha School Documents

The **Head Teacher’s Message** should be one of the most personal and trustworthy sections of the Alpha Adventist Pre & Primary School website. It should not read like a generic welcome paragraph. It should reflect the real leadership, faith identity, educational philosophy and institutional direction of Alpha.

The documents identify **Christopher Mashaka James** as the **Head of School**. The school's governance materials also show that the Head of School is part of a formal institutional structure under the **Western Tanzania Conference of the Seventh-day Adventist Church**, with responsibilities linked to school administration, academic reporting, chaplaincy, professional growth, worship programmes and wider school development. The message should therefore communicate four things clearly: **welcome, educational purpose, Christian identity, and partnership with families.**

Recommended Website Heading

Welcome from the Head of School

Suggested Official Website Message

Welcome to **Alpha Adventist Pre & Primary School**, a Seventh-day Adventist educational institution within the **Western Tanzania Conference – Kigoma**. It is our privilege to serve children and families through an educational environment that seeks to develop the whole learner. At Alpha, we believe that education should go beyond academic achievement. It should also contribute to the spiritual, physical, social, moral and practical development of every child. Our school is guided by the principle of holistic Christian education. We seek to help pupils grow in knowledge, discipline, faith, responsibility, confidence, creativity and service while preparing them for the opportunities and responsibilities of the future.

Every learner comes to Alpha with individual abilities, interests and potential. Our responsibility as educators is to provide appropriate teaching, guidance, encouragement and opportunities that help each child discover and develop those abilities.

We are committed to maintaining strong academic foundations while creating opportunities for pupils to participate in spiritual programmes, technology learning, sports, music, creativity, leadership and other activities that contribute to balanced development.

Our school documents show that Alpha's programme includes formal attention to academics, chaplaincy, school schedules, study tours, professional growth, special worship services and choir programme. These areas should be reflected naturally in the Head of School's message because they demonstrate that Alpha's commitment to holistic education is supported by actual institutional activities. We also recognize that the education of a child is most effective when the **school, parents, teachers, church and community work together**. Parents and guardians are therefore important partners in the learning and development of our pupils. Through communication, cooperation and shared responsibility, we can help children grow academically, spiritually and socially.

As a Seventh-day Adventist school, Alpha seeks to nurture Christian character through faith, integrity, discipline, respect, responsibility and service. Our desire is that pupils leave Alpha not only with knowledge, but also with values and habits that will guide them throughout life.

Technology is also becoming an important part of education. Alpha is progressively strengthening computer and digital learning so that pupils, teachers and workers can develop practical skills for the modern world. This direction supports our broader goal of preparing learners for future education, work and responsible participation in an increasingly digital society. The growth of Alpha is a shared journey. We appreciate the support of the Western Tanzania Conference, the School Board, parents, teachers, workers, pupils and all partners who contribute to the life and development of the school.

We warmly invite you to explore our website, learn more about our academic programmes, Christian education, computer learning, school life and admissions, and discover what makes Alpha a community of learning, faith and growth.

Welcome to Alpha. Together, we educate for good citizenship and eternity.

Recommended Short Homepage Version

The full message above should live on the **about** → **Head of School Message** page. On the homepage, use a shorter version.

A Message from the Head of School

Welcome to Alpha Adventist Pre & Primary School. At Alpha, we believe that every child has unique abilities and deserves the opportunity to grow academically, spiritually, socially and creatively. Our commitment is to provide holistic Christian education that builds knowledge, character, discipline, confidence and responsibility. Working together with parents, teachers, the Church and the wider community, we seek to prepare learners not only for examinations, but also for responsible and meaningful lives. We warmly welcome you to discover Alpha and become part of our school community.

Christopher Mashaka James
Head of School

Read Full Message → Recommended Display for the Developer

The section should use a **two-column layout** on desktop.

On the left: **Professional Head of School photograph**

On the right: **Welcome from the Head of School**

Short message

Christopher Mashaka James

Head of School: Read Full Message → on mobile devices, the photograph should appear above the text. The developer should use an official, recent and approved photograph rather than a casual social-media image.

Photograph Requirements

The Head of School photograph should be:

- High resolution
- Professionally presented
- Recent
- Appropriately dressed
- Taken against a clean background or school environment
- Consistent with Alpha's institutional image

A portrait taken within the school campus, office or another approved educational environment would work particularly well. Avoid excessive editing or decorative effects.

Name and Position

The current school documents identify: **Christopher Mashaka James**

Head of School

For consistency, I recommend the website use **“Head of School”** rather than switching between “Head Teacher,” “Headmaster” and “Head of School,” unless Alpha management officially prefers another title. The CMS should allow authorized administrators to update the name, photograph and message in the future when leadership changes.

Short Signature or Leadership Statement

Below the name, a short leadership statement may be displayed. Recommended:

“Educating the whole child for good citizenship and eternity.”

This is especially appropriate because Alpha's official mission speaks of holistic education directed toward **good citizenry and eternity**. Another acceptable version is:

"Building knowledge, character, faith and responsibility for life."

The first option is more closely connected to Alpha's existing institutional language.

Connection to Alpha's Official Mission and Philosophy

The Head of School's message should reinforce, rather than replace, Alpha's official mission, vision and philosophy. The school's official materials state a mission centered on offering holistic education for good citizenship and eternity and a philosophy based on harmonious development of the **physical, mental, social and spiritual dimensions of life**. The leadership message should therefore consistently reflect those ideas rather than introducing a completely separate educational philosophy. This is important for institutional consistency:

Mission says what Alpha exists to do.

Vision explains where Alpha seeks to go.

Philosophy explains how Alpha understands education.

Head of School Message gives those ideas a human leadership voice.

Parent Partnership

The message should explicitly recognize parents because the relationship between school and family is essential to the website's audience. A strong sentence is:

"We recognise parents and guardians as essential partners in the education, character formation and wellbeing of every learner."

The message can then link to:

Visit Parent Corner → This helps move the visitor from institutional content into useful website services.

Student-Focused Leadership Message

The page can also contain a small highlighted box addressed directly to pupils:

To Our Learners

At Alpha, you are encouraged to learn, ask questions, develop your talents, respect others, grow in faith and use your abilities to make a positive difference.

This makes the leadership page friendlier to children rather than speaking only to adults.

Technology Direction

Because Alpha intends to develop computer training, the Head of School message should mention technology carefully but truthfully. Recommended wording:

"We recognise the growing importance of technology in education and are strengthening opportunities for practical computer and digital learning as part of preparing our learners for the future."

This is stronger than claiming Alpha is already an advanced technology school if every proposed programmer has not yet been fully implemented.

Institutional Credibility

The message should communicate that the school is professionally governed without turning into a board report. The school materials demonstrate formal governance through School Board activities covering Head of School reporting, academic reporting, chaplaincy, registration, finance, professional growth and school programmer. Therefore, the public website may appropriately state that Alpha works within an established **Seventh-day Adventist educational and governance structure**, while confidential internal reports should remain private.

Recommended CTA below the Message

After the Head of School's message, provide three useful actions:

DISCOVER OUR SCHOOL

EXPLORE ACADEMICS

APPLY FOR ADMISSION

This turns the leadership message into part of the visitor journey rather than leaving it as an isolated ceremonial statement.

Developer Content Rule

The message must be editable from the CMS. CMS fields should include:

Head of School Name

Position

Photograph

Short Homepage Message

Full Message

Leadership Quote

Signature Image — optional

Publication Date / Last Updated

This prevents the website from becoming outdated when leadership or institutional priorities change.

Final Recommended Website Version

Welcome from the Head of School

Welcome to **Alpha Adventist Pre & Primary School**, a Seventh-day Adventist educational institution within the **Western Tanzania Conference – Kigoma**. At Alpha, we believe education should develop the whole learner. Our commitment extends beyond academic achievement to spiritual growth, character formation, confidence, creativity, responsibility, physical development and positive social relationships.

We recognize that every child has individual abilities and potential. Through quality teaching, Christian guidance, practical learning, technology, talent development and appropriate discipline, we seek to help each learner grow into a knowledgeable, responsible and confident individual. We also believe that successful education depends upon strong partnership. Parents, teachers, school workers, the Church and the wider community all have an important role in supporting children's development.

As we continue strengthening Alpha, we remain committed to our mission of holistic education and to preparing our learners for good citizenship, service and eternity. We warmly invite you to explore Alpha, discover our programme and become part of our school community.

Welcome to Alpha — where children learn, grow in faith, discover their abilities and prepare for the future.

Christopher Mashaka James

Head of School

Education • Faith • Technology • Talent • Character • Future

11. ACADEMICS

Professional Website Content Based on Alpha School Documents

The **Academics** section should present Alpha Adventist Pre & Primary School as a structured educational institution with clear learning levels, academic monitoring, teacher development, examinations, practical activities and learner progression. The source documents confirm that Alpha formally tracks academic performance through school-board reporting and that “Academic Report” is treated as a distinct governance item alongside registration, school calendar, and timetable and study tours.

The school's 2025 report also contains a dedicated “**Academic Elevation**” section. It records teacher participation in professional seminars and an ECD teachers’ convention, states that teachers are working to raise academic standards, and compares academic performance over several years. This gives the website a stronger basis for presenting Alpha as a school that monitors and seeks to improve both teaching quality and learner outcomes.

Recommended Website Heading

Our Academic Programmed

Learning with Purpose. Growing with Confidence. Preparing for the Future.

Alpha Adventist Pre & Primary School provides education from **KG I and KG II through Standard VII**, serving both day and boarding pupils. The school’s registration records confirm this full progression from early childhood education into upper primary. The academic programme should be presented as part of Alpha’s wider philosophy of holistic education. Academic development should therefore work together with Christian character, spiritual development, practical learning, technology, creativity and responsible behavior.

Recommended Introductory Website Copy

At Alpha, learning is organised to help pupils progressively build knowledge, skills, confidence and good learning habits from the early years through Standard VII. Our academic programme combines classroom teaching, assessment, teacher guidance, practical activities, academic monitoring and appropriate learner support. Through this approach, Alpha seeks to strengthen academic performance while developing disciplined, responsible and confident learners. The website should organize Academics into two principal levels:

**Pre-Primary Education — KG I & KG II And
Primary Education — Standard I to Standard VII**

This structure reflects Alpha’s actual registration records rather than creating artificial programme levels.

Academic Development at Alpha

The website should also communicate that academic improvement is an active institutional responsibility. The Alpha annual report records participation in school-management seminars and ECD teacher training under the theme “**Educating for Mission**”, together with attention to teacher development and academic performance. This supports a website section such as:

Continuous Academic Improvement, Alpha recognizes that strong learning outcomes depend on both pupils and teachers. The school therefore supports professional development, academic monitoring and continuous improvement in teaching practice.

The school’s governance records also include **Professional Growth** and a **Teacher’s Convention** as formal areas of attention. This is important because the Academics page should not simply list subjects. It should show **how Alpha works to improve teaching and learning.**

12. PRE-PRIMARY EDUCATION

KG I & KG II

Alpha's records confirm that the school operates both **KG I and KG II**, with day and boarding enrolment represented in its registration structure. The supplied Alpha documents do **not** provide a complete official Pre-Primary curriculum or detailed list of developmental competencies. Therefore, the website should not present a detailed subject or competency list as an officially documented Alpha curriculum unless management or the Academic Department supplies the approved syllabus. The following is the recommended public-facing structure for the website, subject to verification by Alpha's Academic Department.

Recommended Website Heading

Pre-Primary Education

A Strong Beginning for Lifelong Learning

At Alpha, the early years should provide children with a positive foundation for learning, communication, behavior, confidence and social development. Our Pre-Primary programme for **KG I and KG II** introduces young learners to structured school life in an age-appropriate, supportive and Christian learning environment.

Recommended Development Areas

Subject to confirmation against the school's approved syllabus, the website may explain that early learning develops: **Early Literacy** — recognition of letters, sounds, words, storytelling and beginning reading skills.

Early Numeracy — numbers, counting, patterns, shapes and foundational mathematical thinking.

Communication — listening, speaking, vocabulary and confidence in expressing ideas.

Creativity — drawing, music, movement, imaginative activities and simple practical projects.

Social Interaction — cooperation, sharing, friendship, respect and participation.

Confidence — helping children participate, ask questions and become increasingly independent learners.

Motor Development — activities supporting coordination, handwriting readiness, movement and physical development.

Positive Behaviour — respect, responsibility, classroom routines and Christian values.

Curiosity and Exploration — encouraging children to observe, ask questions and enjoy discovering new things. These areas are educationally appropriate for a Pre-Primary website description, but because the detailed list is not explicitly contained in the supplied Alpha documents, the developer should mark them for **Academic Department approval before publication**.

Pre-Primary Teaching Experience

The website should avoid making Pre-Primary look like a smaller version of upper-primary education. Instead, show:

- Storytelling
- Guided activities
- Songs and movement
- Drawing and creativity
- Early number activities
- Outdoor learning
- Teacher–pupil interaction
- Christian character activities
- Simple technology exposure where appropriate

Use **real Alpha KG photographs**, with appropriate approval, rather than generic nursery-school stock images.

Recommended Website Message

Young children learn best when they feel safe involved and encouraged. Alpha’s early-learning environment should therefore combine structured learning with exploration, creativity, interaction and Christian values.

Early Childhood Teacher Development

A valuable credibility point comes from Alpha’s own report. The school records participation of workers in seminars and specifically notes that **ECD teachers attended an ECD Teachers Convention** aimed at supporting learning and the “Educating for Mission” theme.

This can become a small website block:

Supporting Our Early Years Teachers

Alpha recognizes the importance of professional development in early childhood education. Teacher training and conventions help strengthen classroom practice and support the school’s wider educational mission.

This is stronger and more authentic than simply saying “we have highly trained teachers” without evidence.

13. PRIMARY EDUCATION

Standard I – Standard VII

Alpha’s records confirm a complete primary progression from **Standard I through Standard VII.**

Recommended Website Heading

Primary Education

Building Knowledge, Character and Skills Step by Step

Alpha’s Primary Education programme should be presented as a progressive journey in which learners strengthen academic understanding, communication, independent learning, discipline and preparation for later education. The school should explain that the learning experience combines:

Structured classroom instruction

Teacher guidance

Assessment

Practical learning

Academic monitoring

Christian education

Technology exposure

Talent and personal development

Subjects / Learning Areas

The proposed list in the website draft included:

English, Mathematics, Science, Kiswahili, Social Studies, Religious Education, Computer Studies, Creative Arts and Physical Education.

However, the supplied school-board and annual-report documents **do not provide a complete official subject list.** Therefore, these should not yet be published as Alpha’s confirmed curriculum solely on the basis of the documents reviewed.

For the developer, create an editable **Subjects / Learning Areas** component in the CMS and populate it only after the Academic Department confirms the current official curriculum.

One area that is independently supported in Alpha-related materials is **Computer/ICT learning.**

Alpha primary ICT teaching materials include lessons on computer introduction, computer parts, safe computer use, starting and shutting down computers and smart board-based practical

learning. Therefore, a Computer Studies or Digital Learning link can confidently be incorporated into the academic experience provided the final curriculum wording is approved internally.

Teaching Approach

The website should explain teaching methodology in a way parents can understand.

Recommended wording:

Our Teaching Approach

At Alpha, teaching should support active participation, understanding and gradual learner independence. The programme should combine:

Teacher-led instruction for introducing and explaining concepts.

Learner participation through questions, discussion and classroom activities.

Practical learning where pupils apply concepts through demonstrations, projects, ICT activities and other suitable experiences.

Guided practice where teachers support learners before they work more independently.

Review and reinforcement to strengthen understanding before progression.

The developer should avoid unsupported claims such as “personalized teaching for every child” unless the school has formal structures that guarantee it.

Academic Monitoring

This should be a major subsection because Alpha’s documents clearly support academic performance monitoring. The 2025 report includes comparison of school academic performance across different years and notes teacher efforts to improve standards. Recommended website content:

Monitoring Learner Progress

Alpha recognises that meaningful academic improvement requires regular monitoring.

Teachers and school leadership should use assessment information to:

- Review learner progress.
- Identify academic strengths.
- Identify areas requiring additional attention.
- Monitor class performance.
- Support teaching improvement.
- Prepare learners for formal assessments.
- Inform appropriate academic interventions.

Only approved aggregate academic results should be displayed publicly.

Individual pupil results belong in secure parent/student systems, not on the public website.

Continuous Assessment

The source documents confirm academic performance monitoring but do not provide a detailed official continuous-assessment framework. Therefore, the website should use cautious language:

Assessment for Progress

Learners are assessed through the school’s approved academic processes in order to monitor understanding, progress and readiness for the next stage of learning.

Possible methods can later be listed after the Academic Department confirms them, such as:

- Class exercises
- Assignments
- Tests
- Projects
- Oral activities
- Practical work
- Term examinations

The developer should make these editable rather than hard-code them.

Examinations

Alpha's annual report explicitly refers to performance in **internal and external examinations**. Therefore, the website can confidently include:

Examination Preparation

Alpha monitors pupil performance through internal academic processes and prepares learners for relevant external examinations as they progress through primary education.

The website may show:

- Examination calendar
- Parent notices
- Approved aggregate performance
- Academic achievement stories

It should not publish confidential examination records or personally identifiable pupil results.

Homework and Independent Learning

The supplied documents do not state a formal homework policy. Therefore, instead of presenting detailed rules as established fact, use: **Learning beyond the Classroom**

Where required by the school's academic programme, pupils may receive exercises, revision activities or other learning tasks designed to reinforce classroom learning and develop responsible study habits.

The exact homework arrangements should be supplied by the Academic Department before publication.

Remedial / Learner Support

The documents do not explicitly identify a formal "remedial programme."

Do not claim that Alpha operates one unless management confirms it.

The website may instead use: **Academic Support**

Teachers monitor learner progress and, where school arrangements permit, provide appropriate guidance and additional academic support to help pupils address identified learning difficulties.

If Alpha has scheduled remedial classes, support groups or special intervention sessions, these can later be added as verified content.

Practical Learning

The school's governance materials include **study tours**, while graduation programming includes **academic exhibits**, showing that learning experiences extend beyond ordinary classroom presentation. This supports a website section:

Learning by Doing

Alpha encourages appropriate practical and experiential learning through classroom activities, educational demonstrations, ICT activities, academic exhibits, study tours and other approved learning experiences. The purpose is to help learners connect knowledge with real situations and strengthen understanding, curiosity and confidence.

Computer & Digital Learning Within Academics

The website should provide a direct connection between **Academics** and the separate **Computer & Digital Learning** page.

Alpha-related ICT lesson materials demonstrate a practical approach covering computer introduction, common uses, input/process/output, computer parts, safe use and proper startup/shutdown procedures.

Recommended homepage/Academics-page copy: **Digital Learning**

Alpha is developing practical ICT learning that introduces pupils to computers, safe technology use and digital skills through age-appropriate classroom and computer-laboratory activities.

Button: **Explore Computer & Digital learning** → This is preferable to claiming a large advanced ICT curriculum until all levels and modules have been formally documented.

Talent Support within Academics

The documents show school choir programmes and academic exhibits, but they do not define a formal “Talent Support Programme.” Therefore, recommended wording is:

Beyond Academics

Alpha’s holistic educational approach recognizes that children also develop through creativity, music, leadership, technology, sport and other school activities. Learners should be given opportunities, where available, to participate in activities that develop confidence, teamwork, expression and individual abilities. A separate:

Talent & School Life → page can contain the verified activities offered in each school year.

Academic Results and Achievements

Because Alpha’s annual report contains multi-year performance comparisons, an **Academic Performance** section is justified. The developer should build this area so management can update:

- Year
- Examination type
- Aggregate performance
- Improvement trend
- Academic achievements
- Approved photos
- Short management commentary

Do not hard-code one year's performance forever. A CMS-based chart can later display historical trends.

Recommended Academics Page Architecture

For the website developer, the Academics page should follow this flow:

Academics Hero

- **Our Academic Programme**
- **Pre-Primary: KG I & KG II**
- **Primary: Standard I–VII**
- **Subjects / Learning Areas**
- **Our Teaching Approach**
- **Assessment & Academic Monitoring**
- **Internal & External Examinations**
- **Practical Learning & Study Tours**
- **Computer & Digital Learning**
- **Academic Support**
- **Teacher Professional Development**
- **Academic Results & Achievements**
- **Talent & Holistic Development**
- **Admissions CTA**

Recommended Academic Hero

Use a real photograph of Alpha pupils actively learning.

Learning Today. Preparing for Tomorrow.

From KG I to Standard VII, Alpha seeks to provide structured academic learning supported by Christian values, teacher development, practical experiences and continuous attention to learner progress.

Buttons: **PRE-PRIMARY**

PRIMARY EDUCATION

VIEW ACADEMIC ACHIEVEMENTS

Visual Design

The Academics page should not resemble an examination report. Use:

- Classroom photographs
- KG activity photography
- Teacher–pupil interactions
- Academic exhibit photos
- ICT/computer laboratory photos
- Study-tour images
- Simple performance charts
- Learning-level cards
- Icons for academic areas

The visual tone should communicate **serious education without making learning look stressful or rigid.**

For KG pages, use slightly warmer and more playful visual styling.

For Standard I–VII, gradually use a more structured academic presentation.

Important Accuracy Note for the Developer

Based on the Alpha documents reviewed, the following points are **verified**:

- Alpha operates KG I and KG II through Standard VII.
- The school formally considers academic reporting within its governance structure.
- The school monitors academic performance.
- Teacher professional development and ECD teacher training are documented.
- Internal and external examination performance is referenced.
- Study tours form part of institutional planning.
- Academic exhibits appear in school programming.
- Alpha has practical primary ICT learning materials.

The detailed **subject list, homework policy, continuous-assessment methodology, remedial programme and full Pre-Primary competency framework are not established in the supplied source documents.** Those items should therefore be confirmed by the Head of School/Academic Department before they are presented as official Alpha content.

That distinction is important: the website should be attractive, but it should also remain **true to the school’s actual academic programme.**

Recommended Final Positioning
At Alpha Adventist Pre & Primary School, academics form part of a holistic Seventh-day Adventist education. From KG I through Standard VII, the school seeks to strengthen knowledge, character, faith, practical skills and responsible learning while continually improving teaching and academic performance.

Education • Faith • Technology • Talent • Character • Future

14. COMPUTER CLASS & DIGITAL LEARNING CENTRE □

This should be one of the strongest parts of the website.

ALPHA COMPUTER CLASSES

Professional Website Content Based on Alpha School Materials

The **Computer Class & Digital Learning Centre** should be one of the strongest and most distinctive parts of the Alpha Adventist Pre & Primary School website because there is already evidence of practical ICT learning at Alpha. The available Alpha teaching materials include structured primary ICT lessons on **Introduction to Computers, Computer Parts and Devices, Computer Lab Rules and Safety, and Starting & Shutting Down Computers**. These lessons are designed for smartboard presentation and practical classroom use. The website should therefore present Alpha's technology programme as a **real developing educational programme**, not as a future idea only. At the same time, the website should avoid claiming that every advanced topic—such as Microsoft Excel, PowerPoint, coding, community certification or professional ICT courses—is already formally implemented unless the school approves and documents those areas.

Recommended Main Heading: ALPHA COMPUTER & DIGITAL LEARNING CENTRE

Digital Skills for School, Work and the Future: Recommended Website Introduction

At **Alpha Adventist Pre & Primary School**, computer education is being developed as an important part of preparing learners for modern education and the digital world. Through practical lessons, smartboard activities and supervised computer use, pupils are introduced progressively to computer equipment, safe computer operation, keyboard and mouse skills, file handling, digital responsibility and other age-appropriate ICT concepts. Alpha's current ICT materials emphasize learning that is **clear, simple and practical**, with pupils taking part in demonstrations, smart board activities and paired practice. The long-term direction of the Computer & Digital Learning Centre can support three groups:

Alpha Pupils → current school-based ICT learning

Teachers and Workers → future/approved digital-skills development

Community Learners → future public computer-training programme

For accuracy, these three levels should be visually separated on the website so that visitors can distinguish what is **currently operating** from what is **planned**.

The Purpose of Computer Education at Alpha

The Computer & Digital Learning Centre should not be presented simply as “learning how to use a computer.” The website should explain the broader educational purpose. **Our Digital Learning Purpose:** Alpha seeks to help learners develop the confidence and responsibility required to use technology appropriately for learning, creativity and future development. Computer learning should progressively support:

- Digital confidence, Basic computer literacy, Safe computer operation, Keyboard and mouse coordination, Responsible use of equipment, Digital safety, Practical problem-solving, Independent learning, Creativity, Preparation for more advanced ICT skills

This aligns well with Alpha's wider positioning:

Education • Faith • Technology • Talent • Character • Future

Technology therefore supports education and future preparation while responsible computer use also reinforces discipline and character.

Evidence of Practical ICT Learning

The website can credibly state that Alpha's ICT learning uses **practical activities and smartboard-supported teaching**.

For example, existing materials instruct pupils to identify computer components and explain their functions, while classroom activities involve pupils pointing to items on a smartboard and

matching devices with their names or functions. Other Alpha ICT materials require pupils to practise tasks in pairs, including typing, opening work, saving files and working through guided steps. This supports a strong website statement:

At Alpha, ICT learning is designed to be practical. Pupils do not only hear about computers; they are encouraged to identify, operate and use digital tools through supervised activities.

Recommended Digital Learning Model

For the developer, represent Alpha's computer-learning journey as a simple progression:

1. KNOW

Understand what computers are and what they can do.

2. IDENTIFY

Recognise computer parts and devices.

3. OPERATE

Use the keyboard, mouse and basic computer functions correctly.

4. PRACTISE

Complete supervised computer activities.

5. PROTECT

Learn computer safety and responsible online behaviour.

6. CREATE

Progress toward productivity, creativity and more advanced digital skills as programmes expand. This gives parents an easy way to understand the programme without presenting a complicated technical syllabus.

Computer Laboratory Experience

The Computer Laboratory section should show that pupils are taught to behave safely and responsibly around technology. Existing Alpha lessons teach pupils to:

- Sit properly, Keep water away from computers, Check cables for safety, Wait for teacher instructions, Use only the program assigned by the teacher, Handle the mouse and keyboard gently, sit at an assigned computer. Raise a hand when help is needed.

Recommended Website Copy

Learning Safely in the Computer Lab

Alpha teaches pupils that responsible computer use begins with safety, discipline and care for equipment. Learners are guided to follow laboratory procedures, use devices gently, protect their work and ask for assistance when necessary. This provides an excellent connection between **Technology** and **Character**.

Digital Safety

This deserves a dedicated subsection because the Alpha ICT materials contain explicit child internet-safety guidance. Current lessons teach learners to: Use approved websites, Ask before downloading, Keep passwords private, Avoid sharing home addresses, Avoid strange messages, Avoid communicating with strangers online.

Recommended Website Heading

Safe and Responsible Digital Citizens

Suggested copy:

Learning technology also means learning responsibility. Alpha introduces pupils to age-appropriate digital safety, including password protection, approved online resources, responsible downloading and protecting personal information.

This is a strong real feature that the website should highlight.

15. COMPUTER CLASSES FOR ALPHA STUDENTS

Computer Learning for Alpha Students

Learn • Practise • Explore • Create

At **Alpha Adventist Pre & Primary School**, computer education is designed to help pupils develop practical digital skills gradually according to their age and learning level.

The programme begins with foundational computer knowledge and safe use of technology, giving learners confidence to understand, operate and care for digital equipment while preparing them for more advanced ICT learning in the future.

What Alpha Students Currently Learn

Introduction to Computers

Learners begin by understanding what a computer is, how computers are used and how technology helps people perform different tasks.

Computer Parts and Devices

Pupils learn to identify common computer components such as the monitor, system unit, keyboard, mouse, printer and speakers, and understand the basic purpose of each device.

Input and Output Devices

Learners are introduced to devices used to enter information into a computer, such as keyboards, mice, microphones and scanners, as well as output devices such as monitors, speakers, printers and projectors.

Keyboard Skills and Basic Typing

Pupils practise using letters, numbers, the Space Bar and other basic keyboard functions. Simple typing activities help them build confidence and accuracy when entering information.

Mouse Skills

Learners practise essential mouse actions including **left-clicking, double-clicking, dragging and scrolling**, enabling them to select, open, move and navigate items on the computer.

Opening, Saving and Managing Work

Students learn how to open the correct program, enter information, save their work using appropriate commands such as **Ctrl + S**, and develop basic awareness of files and folders.

Starting and Shutting Down Computers

Pupils learn the correct procedures for switching computers on and off, including checking equipment, waiting for the system to load, saving work, closing programs and shutting down correctly.

Computer Lab Rules and Safety

Safe and responsible use of computers is an important part of the programme. Learners are taught how to behave properly in the computer laboratory, handle equipment carefully and follow teacher instructions.

Internet Awareness and Digital Safety

Children are introduced to responsible online behaviour, including using approved websites, protecting passwords, avoiding unsafe downloads, protecting personal information and reporting suspicious online activities.

Smartboard and Practical Learning

ICT lessons include interactive smartboard activities, demonstrations, questions and supervised practical exercises. Pupils may also work in pairs so that they can learn through cooperation and practice.

Current Foundational ICT Learning

The website can display the programme using simple visual cards:

- ☐ Introduction to Computers
- ☐ Computer Parts & Devices
- ☐ Input & Output Devices
- ☐ Keyboard Skills
- ☐ Mouse Skills
- ☐ Basic Typing
- ☐ Files & Saving Work
- ☐ Starting & Shutting Down Computers
- ☐ Computer Lab Safety
- ☐ Internet Awareness & Digital Safety
- ☐ Smartboard Learning
- ☐ Practical Pair Activities

How We Teach Computer Skills

Learn

The teacher introduces a computer concept using clear explanations, demonstrations and visual teaching materials.

Practise

Learners use computers, keyboards, mice and smartboards to practise what they have learned.

Explore

Pupils develop confidence by identifying devices, solving simple tasks and exploring approved digital learning activities.

Create

As their skills develop, learners can progressively move toward productivity tools, digital creativity and more advanced technology skills.

Safe Digital Learning

At Alpha, learning computer skills also means learning **responsibility**.

Students are encouraged to:

- Handle computers carefully.
- Keep food and drinks away from ICT equipment.
- Follow teacher instructions.
- Save their work properly.
- Protect passwords.
- Use approved websites.
- Avoid sharing personal information online.
- Report computer or online problems to a teacher.

This allows Alpha to develop not only computer users, but also **responsible digital learners**.

Future Digital Learning Development

As Alpha's Computer & Digital Learning programme expands, additional areas may be introduced subject to formal approval and implementation.

Planned Development Areas

Microsoft Word

Document creation, typing and formatting.

Microsoft PowerPoint

Creating and presenting digital slides.

Microsoft Excel

Introduction to spreadsheets, tables and simple calculations.

Digital Drawing & Creativity

Drawing, multimedia and creative digital projects.

Educational Applications

Selected digital tools that support classroom learning.

Introduction to Coding

Age-appropriate computational thinking and basic programming concepts.

Digital Storytelling and Projects

Combining text, images and digital tools to create pupil projects.

The official website should present these as **future or planned programmes until they are formally introduced**, rather than implying they are already fully operational.

Recommended Website Feature

ALPHA DIGITAL LEARNING JOURNEY

Computer Foundations

Keyboard & Mouse Skills

Typing & File Management

Safe Computer Use

Internet Awareness

Productivity Skills – Planned

Digital Creativity – Planned

Coding & Innovation – Future Development

This learning pathway gives parents a simple visual understanding of how Alpha intends to develop pupils from basic computer users into confident digital learners.

Website Photography

This section should use **real Alpha pupils and the actual computer laboratory** wherever approved photographs are available.

Recommended images include pupils:

- Using desktop computers.
- Practising keyboard skills.
- Using a mouse.
- Participating in smartboard lessons.
- Working in pairs.
- Receiving guidance from the ICT teacher.
- Completing practical computer activities.

These photographs should be displayed as evidence of actual learning rather than as decoration.

Recommended Short Website Copy

Computer Learning at Alpha

At Alpha Adventist Pre & Primary School, pupils develop practical computer skills through structured, age-appropriate and supervised learning. Students begin with computer fundamentals, device identification, keyboard and mouse skills, basic typing, saving work, laboratory safety and digital responsibility. Through smartboard activities and hands-on practice, learners build confidence in using technology while preparing for more advanced digital skills in the future.

Learn • Practise • Explore • Create

[Explore Computer Learning]

[View ICT Activities]

Education • Faith • Technology • Talent • Character • Future

Recommended Current Student Curriculum for the Website

Based strictly on the Alpha materials reviewed, the strongest current public-facing list is:

Current Foundational ICT Learning

- Introduction to Computers
- Computer Parts and Devices
- Input and Output Devices
- Keyboard Skills
- Mouse Skills
- Basic Typing Practice
- Opening and Saving Work
- Basic File/Folder Awareness
- Starting Computers Correctly
- Shutting Down Computers Correctly
- Computer Lab Rules
- Safe Handling of ICT Equipment
- Internet Safety for Children
- Smartboard Learning Activities
- Practical Pair Activities

This list is directly supported by existing Alpha materials.

Recommended Future Digital Learning Roadmap

After Alpha formally develops the programme, the website can expand to include:

Stage 1 — Computer Foundations

Current foundational skills.

Stage 2 — Productivity Skills

Word processing, presentations and spreadsheets.

Stage 3 — Internet & Research

Browsers, search, email and educational research.

Stage 4 — Digital Creativity

Drawing, multimedia, presentations and student projects.

Stage 5 — Coding Foundations

Logic, algorithms and age-appropriate block programming.

This roadmap should be displayed as “**Our Digital Learning Direction**” rather than claiming all five stages currently operate.

Photographs for the Website

The website should absolutely include **real photographs of Alpha pupils using computers**, because this turns the technology claim into visible evidence.

Recommended photography should show:

- Pupils seated appropriately at computers.
- Teacher providing guidance.
- Pupils using keyboard and mouse.
- Pupils working in pairs.
- Smartboard activities.
- Pupils practising safe computer use.
- Wide view of the computer laboratory.
- Individual practical exercises.
- ICT displays/projects where available.

A recent Alpha graduation programme also explicitly identifies a **Computer Lab** as a venue for a scheduled special activity, supporting the existence and institutional use of the laboratory.

Photographs should be approved for publication and should not reveal unnecessary private pupil information.

Recommended Website Layout

The Computer & Digital Learning page should flow as:

Technology Hero Image

ALPHA COMPUTER & DIGITAL LEARNING CENTRE

Digital Skills for School, Work and the Future

At Alpha Adventist Pre & Primary School, learners are introduced to practical computer skills through supervised lessons, smartboard activities and hands-on learning. Our goal is to develop confident, responsible and capable users of technology while progressively expanding opportunities for advanced digital learning.

Buttons:

EXPLORE STUDENT ICT

VIEW COMPUTER LAB

COMPUTER TRAINING — COMING SOON

Why This Section Is Justified

This section is not merely a marketing idea. Alpha already has documented ICT learning materials covering computer introduction, devices, keyboard and mouse use, laboratory safety, internet safety, practical saving of work and correct startup/shutdown procedures.

The correct website strategy is therefore to present Alpha as having a **real foundational ICT programme**, while clearly identifying Word, Excel, PowerPoint, advanced Internet skills, digital creativity and coding as areas to be confirmed or progressively introduced.

That approach gives the website credibility because it separates:

What Alpha already teaches

from

What Alpha intends to develop.

Recommended Final Positioning

Alpha Computer & Digital Learning Centre develops practical, safe and responsible computer skills through age-appropriate learning. Beginning with computer fundamentals, device identification, keyboard and mouse skills, file saving, laboratory safety and digital responsibility, Alpha is building a foundation for broader digital skills and future technology education.

ALPHA ADVENTIST PRE & PRIMARY SCHOOL

Education • Faith • Technology • Talent • Character • Future

16. COMPUTER CLASSES FOR TEACHERS

Digital Teaching, Administration & Professional Development

The **Computer Classes for Teachers** section should be presented as part of Alpha Adventist Pre & Primary School's wider commitment to **professional growth and technology-supported education**. Alpha's School Board documentation specifically identifies **Professional Growth** and the **Teacher's Convention** within its institutional programme, providing a sound basis for continued staff capacity development.

Alpha's existing pupil ICT materials also demonstrate actual use of **smartboard-supported instruction, interactive classroom questions and practical digital activities**. For example, learners are asked to respond directly through the smartboard, while teachers are provided with guidance for facilitating the activity. This provides a practical foundation for developing teachers' own digital teaching capabilities.

Recommended Website Heading

Computer & Digital Skills for Teachers

Teach • Create • Manage • Protect • Innovate

At Alpha, technology should support both **classroom teaching and professional school administration**. The proposed teacher digital-skills programme is intended to help teachers confidently use computers and appropriate digital tools to prepare lessons, create teaching resources, manage academic information, communicate professionally and support modern classroom learning.

The programme should be implemented progressively according to teachers' existing skill levels and the technologies actually available at the school.

Training Areas

Computer Fundamentals

Teachers develop confidence in everyday computer operations, including Windows navigation, keyboard and mouse use, files and folders, storage devices, printing and basic troubleshooting.

Microsoft Word

Practical training can cover lesson plans, schemes of work, examinations, assignments, letters, reports, tables and other school documents. Teachers should learn formatting, page setup, headers and footers, tables, images and preparation of professional printable documents.

Microsoft Excel

Excel training can support marksheets, assessment records, attendance, simple calculations, summaries and basic academic analysis. More advanced training can later introduce formulas, sorting, filtering and charts.

Microsoft PowerPoint

Teachers can learn to prepare attractive classroom presentations using text, images, diagrams, tables and appropriate multimedia. This is particularly relevant because Alpha's existing ICT teaching materials already use presentation-based lessons designed for smartboard delivery.

Email & Digital Communication

Training can cover professional email communication, attachments, document sharing, inbox organisation and responsible communication with school administration and other authorised recipients.

Internet Research

Teachers can develop skills for locating educational resources, evaluating online information, downloading authorised materials and using the internet responsibly for lesson preparation and professional development.

Smartboard Use

Teachers should learn how to present lessons, display learning materials, involve pupils in interactive activities and manage classroom content using the smartboard. This directly extends Alpha's existing smartboard-supported ICT approach.

Digital Teaching Aids

Teachers can learn to develop presentations, worksheets, diagrams, visual learning materials, quizzes and other age-appropriate digital resources that make lessons easier for pupils to understand.

Electronic Assessments & Examinations

Subject to Alpha's approved assessment procedures, teachers can be trained to prepare examinations digitally, create question banks, format examination papers, maintain marksheets

and analyse results. The website should describe this as a **training/development area**, rather than implying that Alpha currently operates a complete electronic examination platform.

Student Records & Academic Data

Teachers can learn appropriate digital methods for maintaining attendance, assessment information and other authorized academic records. Access to pupil information should follow school permissions and confidentiality requirements.

Digital Lesson Preparation

Teachers can combine Word, PowerPoint, online educational resources and smartboard materials to create structured lessons, teaching notes, exercises and revision resources.

Cyber security Awareness

Training should help teachers recognise phishing, suspicious links and unsafe downloads; create strong passwords; protect school devices; secure accounts; use removable media safely; and report suspected security incidents.

Data Protection & Privacy Awareness

Teachers handle children's and families' information, so training should cover responsible collection, access, storage, sharing and disposal of personal information. Particular attention should be given to pupil records, photographs, examination information, contact details and information shared through digital platforms.

Important accuracy for the website

The Alpha documents reviewed support **professional growth, teacher development, smartboard-based teaching and an operational computer-lab context**. The school's graduation programme, for example, specifically identifies the Computer Lab as a school activity venue.

However, the documents reviewed do **not establish that Alpha currently operates a formal teacher-training curriculum covering all of Microsoft Word, Excel, PowerPoint, email, electronic examinations, cybersecurity and data protection**. These should therefore be presented as the **proposed scope of Alpha's teacher digital-capacity programme** until management formally approves and implements them.

Programme Objective

To strengthen teachers' digital competence so they can use technology confidently, responsibly and effectively in classroom teaching, lesson preparation, assessment, communication and authorised administrative work.

The programme should ultimately help Alpha move from simply **having computers and smartboards** toward effectively **integrating technology into teaching and school operations**.

Recommended Training Pathway

Digital Foundation → Office Productivity → Smartboard Teaching → Digital Content Creation → Academic Data & Assessment → Internet Research → Cybersecurity → Data Protection → Continuous Digital Professional Development

This progression allows beginner teachers to start with fundamentals while more experienced teachers move toward classroom integration and digital administration.

Recommended Website Copy

Empowering Teachers Through Technology

At Alpha Adventist Pre & Primary School, developing learners' digital skills also requires strengthening the digital capabilities of their teachers. Through progressive ICT capacity development, Alpha aims to equip teachers with practical skills for computer use, digital lesson

preparation, smartboard-supported teaching, office productivity, academic record management, online research and responsible use of digital information.

Our goal is to help teachers use technology not simply as an administrative tool, but as an effective resource for **teaching, learning, communication and continuous professional growth**.

Professional Growth • Digital Teaching • Better Learning

[Explore Teacher Digital Training] [View ICT Activities]

This section fits particularly well under **Alpha Computer & Digital Learning Centre**, with separate website pathways for **Students, Teachers, Workers**, and eventually **Community Computer Training**.

17. COMPUTER CLASSES FOR SCHOOL WORKERS

Digital Skills for Efficient, Secure and Professional School Operations

The **Computer Classes for School Workers** should form a distinct part of the Alpha Computer & Digital Learning Centre. While pupil ICT classes focus on learning and teachers' training focuses primarily on digital teaching, the workers' programme should focus on **administration, productivity, communication, records management, information security and efficient delivery of school services**.

This direction is consistent with Alpha's actual organisational structure. The school's documents demonstrate formal administrative and financial functions, including the Head of School, Treasurer and Deputy Head of School, while School Board business covers finance, human resources, school budgeting, audited financial statements, purchasing, employment matters and professional growth.

The programme described below should, however, be presented as an **Alpha staff digital-capacity development programme** unless management confirms that every module is already being delivered. Alpha's existing documents support the need for staff development and the existence of ICT facilities, but they do not establish that all the following staff courses are currently operational.

Recommended Website Heading

Computer & Digital Skills for School Workers

Learn • Work Smarter • Communicate • Protect Information

At Alpha Adventist Pre & Primary School, digital competence is important not only for pupils and teachers but also for employees responsible for the school's daily administration and support services.

The proposed **Computer Classes for School Workers** programme is designed to strengthen practical digital skills that employees can apply directly to their responsibilities. Training can be adapted according to each employee's role, current computer knowledge and level of access to school systems.

The objective is to help staff perform their duties **more accurately, efficiently, securely and professionally**, while strengthening the school's transition toward modern digital administration.

Who the Training Is For

Administrators

Administrative personnel can develop practical skills for preparing official documents, organising information, communicating electronically, managing files and supporting routine school operations.

Accounts & Finance Personnel

Finance staff can strengthen their use of computers for spreadsheets, financial records, reports, electronic filing and secure management of financial information.

Alpha's financial documentation demonstrates an established accounting and reporting function, including financial statements denominated in Tanzanian shillings and a formally identified Treasurer.

Secretaries

Secretarial personnel can develop skills in professional document preparation, correspondence, email, printing, scanning, electronic filing, meeting documentation and records organisation.

Office Assistants

Office-support personnel can learn basic computer operation, printing, scanning, copying, document handling, digital communication and safe use of shared office equipment.

Other School Staff

Other employees whose responsibilities require access to computers, digital records, communication systems or school information can receive training appropriate to their roles.

The programme should therefore be **role-based rather than identical for every worker**.

Proposed Training Areas

1. Computer Fundamentals

Employees who have limited computer experience should begin with basic operations, including:

- Identifying computer components.
- Using the keyboard and mouse.
- Starting and shutting down computers correctly.
- Navigating the operating system.
- Opening and closing applications.
- Working with files and folders.
- Using removable storage safely.
- Basic troubleshooting.

Alpha already has foundational ICT materials covering safe startup and shutdown procedures, providing useful internal material that can be adapted for beginner staff training.

2. Typing & Document Skills

Staff should develop confidence and accuracy in keyboard use for everyday administrative work. Training can cover professional typing, editing text, keyboard shortcuts and preparation of common school documents.

Practical exercises should use realistic school scenarios rather than unrelated generic examples.

3. Microsoft Office Productivity

The programme can progressively cover the major productivity applications required for school administration.

Microsoft Word can support letters, reports, meeting minutes, notices, forms and other official documents.

Microsoft Excel can support tables, calculations, registers, budgets, summaries and basic analysis, particularly for authorised administrative and financial personnel.

Microsoft PowerPoint can support meetings, staff training, reports and presentations.

The website should describe these as **training areas offered or planned under the staff programme once formally approved**, because the Alpha documents reviewed do not establish that all employees currently receive Microsoft Office training.

4. Email & Professional Digital Communication

Staff should be able to use email and other school-approved communication channels professionally and safely. Training can cover composing professional messages, attaching documents, organising messages, recognising suspicious emails and understanding when information should or should not be transmitted electronically. A key principle should be: **Use the right information, send it to the right person, through the right authorised channel.**

5. Printing & Scanning

Workers responsible for documents should understand how to:

- Select appropriate printers.
- Configure basic print settings.
- Print selected pages.
- Scan documents.
- Produce readable digital copies.
- Name scanned files properly.
- Store them in appropriate folders.
- Avoid unnecessary duplicate printing.

This is particularly useful for administrative, finance and secretarial operations.

6. Electronic Filing

Moving from paper-only processes toward organised electronic records requires more than simply scanning documents. Staff should learn a consistent approach such as:

Create → Name → Classify → Save → Retrieve → Protect → Archive/Dispose

Electronic files should have understandable names, appropriate folder structures and controlled access. Examples could include authorised folders for administration, finance, staff, academic operations and other school functions.

7. Records Management

Workers should learn how to manage school records throughout their lifecycle.

Training can address:

Creation → Classification → Storage → Access → Updating → Retention → Archiving → Secure Disposal

The purpose is to make school information easier to locate while reducing loss, duplication, unauthorised access and unnecessary retention. Because different records have different confidentiality requirements, the training should distinguish ordinary operational information from confidential staff, pupil and financial records.

8. Digital Communication

Staff can be trained to use approved digital communication tools effectively for internal coordination and authorised external communication.

This may include:

- Official email.
- Digital notices.
- Electronic documents.
- Approved messaging channels.
- Online meetings where applicable.
- File sharing.
- Internal announcements.

The programme should also establish that convenience does not override confidentiality.

9. Basic Cybersecurity Awareness

Every worker who uses a computer or handles school information creates either a layer of protection or a potential security weakness.

The programme should therefore include basic cybersecurity awareness covering:

- Strong passwords and passphrases.
- Keeping credentials private.
- Phishing and suspicious emails.
- Unsafe links and attachments.
- Malware awareness.
- Safe use of USB devices.
- Locking unattended computers.
- Software updates.
- Reporting suspicious activities.
- Protecting school accounts.
- Safe internet use.

Cybersecurity should be taught through practical examples that staff are likely to encounter in their everyday work.

10. Safe Handling of School Information

This should be one of the most important components.

School workers may encounter information relating to **children, parents, employees, finances, admissions, examinations and administration**. Staff should therefore understand that access to information is based on their job responsibilities—not simply because the information exists on a school computer. Training should reinforce principles such as:

Access only what your role requires.

Do not disclose confidential information without authority.

Verify recipients before sending information.

Protect passwords and accounts.

Do not leave confidential records exposed.

Report lost information, suspicious access or security incidents promptly.

This module can later be aligned with Alpha's approved privacy, cybersecurity and records-management policies.

Recommended Role-Based Training Model

For implementation, Alpha should avoid forcing every employee through exactly the same technical curriculum.

Staff Category	Priority Digital Skills
Administrators	Word, Excel, email, electronic filing, reporting, records and information security
Accounts/Finance	Excel, financial records, electronic filing, backups, cybersecurity and confidentiality
Secretaries	Typing, Word, email, printing, scanning, correspondence and records
Office Assistants	Computer basics, printing, scanning, files and safe equipment handling
Other Staff	Basic digital literacy, communication, cybersecurity and role-specific applications

This makes the programme practical because workers learn technology according to **what they actually need to perform their jobs**.

Training Levels

The website can present the programme through three progressive levels:

LEVEL 1 — DIGITAL FOUNDATION

Computer Basics • Keyboard & Mouse • Typing • Files & Folders • Printing & Scanning

LEVEL 2 — DIGITAL OFFICE

Word • Excel • PowerPoint • Email • Electronic Filing • Digital Communication

LEVEL 3 — DIGITAL RESPONSIBILITY

Records Management • Cyber security Awareness • Information Protection • Safe Data Handling

This structure makes the programme understandable to employees who may begin with very different skill levels.

Programme Objective

Our Objective

To strengthen the digital capability of Alpha school workers so they can perform administrative and support responsibilities efficiently, accurately, securely and professionally while contributing to the school's digital development.

The intended operational improvement is:

Paper-heavy and manual processes

- **Digitally supported processes**
- **Organised electronic records**
- **Secure information handling**
- **Faster and more accountable school administration**

Connection to Alpha's Institutional Development

Alpha's School Board agenda demonstrates that school administration involves structured responsibilities across **finance, budgeting, purchasing, human resources, employment, academic administration and professional growth.**

The school also has a documented Computer Lab used within institutional activities.

This makes staff digital-capacity development a logical extension of Alpha's existing institutional and ICT environment.

More broadly, Seventh-day Adventist education guidance recognises faculty/staff development and continuing professional education as important to institutional effectiveness and mission.

Recommended Website Copy

Digital Skills for Alpha School Workers

Technology should make school work easier, more organized and more secure.

Alpha's Computer & Digital Learning Centre aims to progressively strengthen the digital skills of administrators, accounts personnel, secretaries, office assistants and other school workers.

Training can cover **computer fundamentals, typing, Microsoft Office, email, printing and scanning, electronic filing, records management, digital communication, cybersecurity awareness and safe handling of school information.**

Through practical, role-based training, Alpha seeks to help its workers use technology confidently and responsibly while improving the efficiency, accuracy and security of school operations.

Learn • Organise • Communicate • Protect • Improve

[Explore Staff Digital Training]

[View Computer & Digital Learning Centre]

For the official site, I would label this section “**Staff Digital Capacity Development**” beneath the public-facing title “**Computer & Digital Skills for School Workers.**” That makes it sound like a serious institutional development programme rather than a basic computer course.

18. COMPUTER TRAINING FOR THE PUBLIC — COMING SOON

Alpha Community Computer Training Programme

Digital Skills for Everyone

Learn • Practise • Connect • Work • Grow

After reviewing the available Alpha documents, this section should be presented clearly as a **future community-development initiative**, not as an existing public training service. The documents confirm that Alpha has a **Computer Lab** used for school activities, and its governance materials refer to the **school community, professional growth, service and outreach-related activities**.

Alpha's April 2025 Board documentation also explicitly describes decision-making for the benefit of the “**school community**” and records a pupil sponsorship proposal as a means of “**reaching out.**” This provides genuine institutional evidence of a community-oriented outlook. However, the Alpha documents reviewed do **not** confirm that a public computer-training programme has already been formally approved, launched, priced or certified. Therefore, the website should use “**Coming Soon,**” “**Planned Programme,**” or “**Register Your Interest**” until formal approval and implementation.

Recommended Website Content

ALPHA COMMUNITY COMPUTER TRAINING PROGRAMME

Computer Classes for Everyone — Coming Soon

Alpha Adventist Pre & Primary School is exploring the future expansion of its digital-learning activities through an **Alpha Community Computer Training Programme**.

The proposed programme will provide practical, beginner-friendly computer training designed to help members of the wider community develop useful digital skills for **education, employment, business, communication and everyday life**.

Training will be practical and progressive, allowing beginners to start with computer fundamentals before advancing to productivity and internet-based skills.

COMING SOON

Join our interest list to receive information when registration, courses, schedules and training requirements are officially announced.

[JOIN WAITING LIST]

Who Will the Programme Serve?

Once formally approved and launched, the programme may be designed for:

- **Parents** who want greater confidence using computers and digital services.
- **Youth and school leavers** preparing for further education and employment.
- **Job seekers** who need practical workplace computer skills.
- **Small-business owners and entrepreneurs** seeking basic digital productivity skills.
- **Teachers from other schools** interested in strengthening practical ICT capabilities.
- **Office workers** who want to improve productivity and digital-office skills.
- **Community members** who need computer knowledge for everyday activities.
- **Complete beginners** who have little or no previous computer experience.

Rather than advertising “anyone” without qualification, the website should explain that final eligibility, age requirements and available courses will be announced when the programme is formally launched.

Proposed Training Areas

Practical Skills for the Digital World

Subject to final approval, available facilities and curriculum development, future community courses could progressively cover:

Computer Fundamentals

Understanding computer parts, Windows navigation, keyboard and mouse operation, files and folders, storage and safe computer use.

Typing & Keyboard Skills

Developing accuracy and confidence when entering information and preparing digital documents.

Microsoft Word

Creating letters, CVs, reports, applications, business documents and other professional documents.

Microsoft Excel

Introduction to spreadsheets, tables, calculations, records and basic business or office data management.

Microsoft PowerPoint

Preparing clear and professional digital presentations.

Internet & Online Research

Using browsers, search tools and online resources effectively and responsibly.

Email & Digital Communication

Creating and using email, sending attachments and communicating professionally online.

Printing, Scanning & Electronic Filing

Managing everyday digital-office documents and electronic records.

Digital Safety & Cybersecurity Awareness

Passwords, phishing awareness, suspicious links, malware risks, privacy and responsible internet use.

Digital Skills for Employment & Small Business

Practical applications of computer skills for CV preparation, workplace productivity, business records and professional communication.

These should appear on the site under “**Proposed Training Areas**” until Alpha formally approves the public curriculum.

Why Community Digital Training?

Digital skills increasingly support education, communication, administration, employment and business. Alpha's proposed community programme can extend the practical value of its Computer & Digital Learning Centre beyond pupils and employees.

This direction also fits the broader service orientation found in Adventist educational thinking. Official Adventist education resources discuss schools as potential centres for community engagement and lifelong-learning activities, while Adventist curriculum resources connect practical skills with service to community needs.

This external Adventist guidance supports the **concept**, but it should not be presented as evidence that Alpha has already approved this particular programme.

Proposed Learning Pathway

The website can visually communicate the future programme as:

START

Computer Basics

Keyboard & Typing

Files & Folders

Microsoft Office Skills

Internet & Email

Digital Safety

Work & Business Applications

Advanced/Selected Digital Skills

From Beginner to Confident Digital User

This gives prospective participants a clear picture of what the programme intends to achieve without promising courses that are not yet available.

Practical Training Approach

Learn by Doing

The future programme should emphasise practical training rather than theory alone. Participants would learn through instructor demonstrations, guided computer exercises, individual practice, real-life office tasks and supervised digital activities. For example, instead of only explaining Microsoft Word, a participant could prepare a letter or CV. Instead of only explaining email, the learner could practise composing a professional message and attaching a document. This approach is also consistent with Alpha's existing pupil ICT materials, which already use practical and interactive computer-learning methods.

Future Course Information

Once management approves the programme, the website should dynamically publish:

Course Name | Target Group | Duration | Training Schedule | Entry Level | Course Fee | Available Seats | Registration Status | Certificate Status

Importantly, “**Certificate Status**” should be included because the website should not promise certificates until Alpha determines the type of certificate, approval process, curriculum requirements and issuing authority. Likewise, do not publish fees, course duration or specific commencement dates until management approves them.

JOIN THE WAITING LIST

Be Among the First to Know

Interested community members can register their interest before the programme launches.

The waiting-list form should request only necessary preliminary information, such as **Full Name, Phone Number, Email if available, Age Group, Occupation/Status, Preferred Course, Current Computer Skill Level and Preferred Training Period.**

The form should also clearly state that joining the waiting list **does not constitute admission or guarantee a training place**. Because the form collects personal information, the website should display an appropriate privacy notice and avoid collecting unnecessary sensitive information.

Recommended Website Banner

COMPUTER CLASSES FOR EVERYONE

COMING SOON

Practical digital skills for education, employment, business and everyday life.

Alpha Adventist Pre & Primary School is preparing for the future expansion of its Computer & Digital Learning Centre to serve selected members of the wider community.

No experience? Start from the basics.

Already using computers? Build stronger practical skills.

[JOIN WAITING LIST]

Registration dates, approved courses, fees, schedules and eligibility requirements will be announced after the programme is formally launched.

Website Status Badge

I recommend placing a prominent status indicator beside the programme title:

PROGRAMME STATUS: COMING SOON

This is important. The Alpha documents reviewed establish the school's Computer Lab and community/service orientation, but they do **not** establish an already operational public computer-training programme. Once formally approved, the CMS can change the status sequentially from:

COMING SOON → REGISTRATION OPEN → ENROLLING → CLASS IN

PROGRESS → NEXT INTAKE

That allows the website to remain accurate without redesigning the page each time.

Final Short Website Version

Alpha Community Computer Training Programme

Digital Skills for Everyone — Coming Soon

Alpha Adventist Pre & Primary School plans to progressively extend selected digital-learning opportunities to the wider community through the proposed **Alpha Community Computer Training Programme**.

The programme is intended to provide practical computer skills for **parents, youth, school leavers, job seekers, business owners, teachers, office workers and other community members**, including complete beginners.

Future training may include **computer fundamentals, typing, Microsoft Office, internet and email, electronic filing, digital communication, cyber security awareness and practical digital skills for work and business**.

Learn practical skills. Build digital confidence. Prepare for new opportunities.

[JOIN WAITING LIST]

Full programme details will be announced following formal approval and launch.

Education • Faith • Technology • Service • Community • Future

19. PROPOSED COMPUTER COURSES

Alpha Computer & Digital Learning Centre

I reviewed the available Alpha ICT materials specifically against the proposed course areas. The strongest evidence supports **Computer Basics, hardware/software concepts, computer operation, files/saving, practical ICT activities and Internet safety**. Alpha's materials explicitly teach computer fundamentals, hardware and software, input–process–output, storage

and safe computer use. The school's 2026 graduation programme also specifically identifies a **Computer Lab** as a school activity location, so the website can legitimately build a Computer & Digital Learning Centre section around an existing ICT environment. However, **Word, Excel, PowerPoint, advanced email, coding and Scratch are not established as existing Alpha courses in the materials reviewed.** They should therefore appear under “**Proposed Courses / Coming Soon**” until the school formally approves the curriculum.

Proposed Computer Courses

Practical Digital Skills for Learning, Work and Everyday Life

Alpha Adventist Pre & Primary School proposes to progressively expand its computer-training programme through a range of practical courses designed for different levels of digital experience. The programme will build from **basic computer literacy** toward office productivity, internet communication, digital safety and introductory technology skills. Courses may be adapted for pupils, teachers, school workers and—when formally launched—eligible members of the wider community.

1. Computer Basics

Build a Strong Digital Foundation

This foundational course is intended for beginners and learners who want greater confidence using computers. Alpha's existing ICT materials already distinguish **hardware** as physical computer components and **software** as programs and applications, and introduce learners to computer types and practical computer use. **Proposed topics:** Introduction to Computers • Hardware & Software • Basic Windows Operation • Keyboard & Mouse Skills • Files & Folders • Saving Documents • Basic Printing • Safe Computer Use

Learning outcome: Participants should be able to identify major computer components, understand basic hardware and software concepts, navigate a computer at foundation level, create and save work, and use common computer functions safely.

Status: Foundation content already supported by Alpha ICT materials; expanded course structure to be approved.

2. Microsoft Word

Create Professional Documents

This proposed course would introduce participants to word processing for educational, administrative, employment and everyday purposes.

Proposed topics: Creating Documents • Editing Text • Text and Paragraph Formatting • Tables • Pictures and Shapes • Page Layout • Headers & Footers • Saving Documents • Printing

Practical exercises could include preparing letters, assignments, reports, notices and simple CVs.

Learning outcome: Participants should be able to create, edit, format, save and print well-organised documents.

Status: Proposed / Coming Soon — the Alpha materials reviewed do not establish a current formal Microsoft Word course.

3. Microsoft Excel

Organise, Calculate and Present Information

The proposed Excel course would introduce learners to spreadsheets and basic data management, with applications for school, office and small-business environments.

Proposed topics: Worksheets • Rows & Columns • Data Entry • Cell Formatting • Basic Formulas • Calculations • Tables • Sorting & Filtering • Basic Charts • Simple Reports

Practical exercises could include marksheets, attendance records, expense tables and simple business records.

Learning outcome: Participants should be able to enter and organise information, perform basic calculations and prepare simple spreadsheet reports.

Status: Proposed / Coming Soon.

4. Microsoft PowerPoint

Communicate Ideas Visually

This proposed course would help learners prepare clear digital presentations for education, meetings and professional communication. Alpha already uses smartboard-oriented presentation materials in its ICT teaching, demonstrating an institutional context for presentation-supported learning.

Proposed topics: Creating Slides • Slide Layouts • Text Formatting • Pictures • Shapes & Diagrams • Tables • Transitions • Basic Animations • Slide Shows • Presentation Delivery

Learning outcome: Participants should be able to prepare and deliver a simple, clear and visually organised presentation.

Status: Proposed / Coming Soon — smartboard use is evidenced, but pupil/public PowerPoint training is not yet documented.

5. Internet & Email

Connect, Search and Communicate Responsibly

This course should combine practical internet use with responsible digital behaviour.

Alpha's existing ICT material already teaches children to use approved websites, ask before downloading, protect passwords, avoid sharing home addresses, avoid strange messages and avoid communicating with strangers online.

Proposed topics: Internet Basics • Web Browsers • Effective Searching • Evaluating Online Information • Email Basics • Sending & Receiving Messages • Attachments • Safe Downloads • Online Communication • Internet Safety

Learning outcome: Participants should be able to find information, communicate electronically and use online resources with greater confidence and safety.

Status: Internet-safety foundation verified; broader Internet and email curriculum proposed.

6. Digital Office Skills

Practical Skills for the Modern Workplace

This should be presented as a combined productivity course rather than duplicating individual Word, Excel and PowerPoint modules.

Proposed topics: Microsoft Word • Microsoft Excel • Microsoft PowerPoint • Email • Printing • Scanning • Electronic Filing • File Organisation • Office Communication • Basic Records Management. The course would be particularly appropriate for teachers, administrators, secretaries, office workers, school leavers and other participants preparing for digitally supported workplaces.

Learning outcome: Participants should be able to perform common digital-office tasks more efficiently, organise documents and communicate professionally.

Status: Proposed / Coming Soon.

7. Digital Safety & Cyber Awareness

Use Technology Safely and Responsibly

Digital safety should be a cross-cutting component of **every Alpha computer course**, rather than only an optional standalone subject.

Alpha's existing materials already contain explicit password, download and online-safety guidance.

Proposed topics: Password Safety • Phishing Awareness • Safe Browsing • Suspicious Links & Attachments • Malware Awareness • Safe Downloads • Social Media Safety • Privacy Awareness • Personal Information Protection • Responsible Digital Behaviour

Learning outcome: Participants should recognise common digital risks, protect accounts and personal information, and use computers and online services more responsibly.

Status: Basic Internet-safety principles verified; broader cybersecurity/privacy curriculum proposed for expansion.

8. Introduction to Coding

Think • Solve • Create

This should be positioned as a **future-development course**, particularly for pupils and young learners.

Proposed topics: Computational Thinking • Logic • Sequences • Simple Algorithms • Block-Based Programming • Scratch • Simple Projects • Introduction to Web Concepts

Rather than beginning with complex programming languages, beginners could first learn how to break problems into steps, understand instructions and create simple interactive projects using visual programming environments.

Learning outcome: Learners should develop introductory computational thinking, logical problem-solving and an understanding of how computer programs are created.

Status: Future Development — coding, Scratch and web development are **not confirmed in the Alpha documents reviewed**.

Recommended Course Structure for the Website

For a cleaner website, I recommend displaying the courses as interactive cards:

Course	Level	Website Status
Computer Basics	Beginner	Foundation Available/Supported
Microsoft Word	Beginner–Intermediate	Proposed
Microsoft Excel	Beginner–Intermediate	Proposed
Microsoft PowerPoint	Beginner–Intermediate	Proposed
Internet & Email	Beginner	Proposed; safety foundation established
Digital Office Skills	Beginner–Intermediate	Proposed
Digital Safety	All Levels	Foundation established / expanding
Introduction to Coding	Foundation	Future Development

Each card can open a page showing **Course Overview** → **What You Will Learn** → **Who It Is For** → **Training Method** → **Duration** → **Schedule** → **Fees** → **Registration Status**. Duration, fees and certificates should remain hidden or marked “**To Be Announced**” until approved.

How the Courses Will Be Delivered

Learn by Doing

The proposed Alpha computer courses should emphasise practical learning. Participants should not only listen to explanations; they should practise directly on computers through guided activities, demonstrations, exercises and real-world tasks. This is consistent with Alpha's existing ICT teaching approach. Current materials use pair work, smartboard interaction and practical classroom activities rather than theory alone. A suitable website message is:

At Alpha, digital skills are developed through practical experience. Learners are guided step by step from understanding a concept to practising it independently and applying it to real tasks.

Recommended Learning Pathway

BEGINNER

Computer Basics

PRODUCTIVITY

Word → Excel → PowerPoint

CONNECTED USER

Internet → Email → Digital Communication

DIGITAL OFFICE

Documents → Spreadsheets → Presentations → Filing

SAFE DIGITAL USER

Cyber Awareness → Privacy → Responsible Technology Use

FUTURE DIGITAL CREATOR

Logic → Algorithms → Block Coding → Scratch → Web Concepts

Start with the Basics. Build Practical Skills. Grow with Technology.

Recommended Final Website Copy

Explore Our Proposed Computer Courses

Whether you are beginning to use a computer or looking to strengthen your digital skills, the **Alpha Computer & Digital Learning Centre** is developing practical training pathways designed around real-life learning, education and workplace needs. Proposed courses include **Computer Basics, Microsoft Word, Microsoft Excel, Microsoft PowerPoint, Internet & Email, Digital Office Skills, Digital Safety and Introduction to Coding**. Alpha's existing ICT programme already provides a foundation in computer concepts, hardware and software, safe computer operation and responsible internet use. Additional courses will be introduced progressively following school approval, curriculum development and confirmation of training arrangements.

Learn • Practise • Create • Connect • Protect • Grow

[VIEW PROPOSED COURSES] [JOIN WAITING LIST]

Programme Status: EXPANDING / SELECTED COURSES COMING SOON

20. COMPUTER TRAINING CERTIFICATE

Recognition of Successful Course Completion

I reviewed the available Alpha documents together with the proposed computer-training framework. Alpha's records **do support an institutional practice of certification and awards**: the official 2026 Graduation Programme includes a specific “**Certification/Award**” activity. However, I did **not find an Alpha document establishing an existing Computer Training Certificate, its approved design, assessment threshold, certificate numbering system, or authorising signatories**. Therefore, this website section should initially be presented as part of the **proposed Computer Training Programme**, not as an already established qualification.

There is also an important regulatory distinction: an internal **Certificate of Completion** should not be represented as a nationally recognised academic, technical or vocational qualification unless the programme has the necessary regulatory recognition/accreditation. Tanzania's technical and vocational certification framework places formal awards and approved programmes within the relevant regulatory system.

Recommended Website Heading

Computer Training Certificate

Learn • Complete • Demonstrate • Achieve

Participants who successfully complete an **approved Alpha computer-training course** may receive an **Alpha Computer Training Certificate of Completion**, subject to the requirements established for that particular programme. The certificate would recognize the participant's completion of the specified training and, where applicable, successful completion of the course assessment. **Certificate Provided Upon Successful Completion**

Purpose of the Certificate

The proposed certificate should serve as an official **school-issued record of training completion**. It can recognise the learner's participation, successful completion of required practical activities and achievement of the minimum assessment requirements established by Alpha for the particular course. For public clarity, the certificate should be described as a **Certificate of Completion** rather than a diploma, professional certification or nationally recognized qualification unless Alpha later obtains the relevant approval for such an award.

Certificate Eligibility

A certificate should not be issued merely because a participant registered for a course. Alpha should establish clear completion requirements. A suitable model would require the participant to **complete the required training period, meet the minimum attendance requirement, complete prescribed practical exercises and obtain the approved assessment result**.

The exact pass mark and attendance percentage should be determined by Alpha management and the ICT/training team before publication. The website should therefore not invent percentages at this stage.

Recommended Training Process

Register → Attend → Learn → Practise → Complete Assessment → Verify Results → Approve → Issue Certificate

This creates a stronger certificate-control process and helps protect the credibility of Alpha's training programme.

Information on the Certificate

Each approved Certificate of Completion should contain:

Certificate Field	Purpose
School Name & Logo	Identifies Alpha Adventist Pre & Primary School as the issuing institution
Training Programme	Identifies the Computer & Digital Learning programme
Learner's Full Name	Identifies the certificate holder
Course Completed	Shows the specific training completed
Training Period	Records when the training took place
Assessment Result	Records performance where formal assessment is used
Certificate Number	Provides a unique reference for verification

Trainer's Name & Signature	Confirms training delivery
Authorised School Signature	Confirms institutional approval
Official School Stamp	Supports authenticity
Date of Issue	Records when the certificate was formally issued

For stronger governance, Alpha could additionally include a **QR verification code** in the future, but only after a secure certificate-verification system exists.

Certificate Numbering & Verification

A unique certificate number is strongly recommended. For example, Alpha could adopt an internal format such as:

AAPS-ICT-2026-0001

where **AAPS** identifies the school, **ICT** identifies the programme, **2026** identifies the year and **0001** is the unique sequential certificate number. This numbering format is a **recommendation**, not an existing Alpha standard found in the documents. Alpha should maintain a secure **Certificate Register** recording the certificate number, learner name, course, training period, result, and issue date and certificate status. Public website verification should expose only the minimum information necessary to confirm authenticity.

Assessment & Certification

Completion Should Demonstrate Learning

Where a course includes assessment, Alpha can use appropriate methods such as practical computer exercises, short quizzes, assignments or supervised tasks. For example, a Computer Basics learner might be asked to demonstrate how to start a computer correctly, use the keyboard and mouse, create or save a file and shut the computer down safely. A future Microsoft Word learner could be assessed by creating and formatting a document rather than answering theory questions only. This approach would make the certificate reflect **demonstrated practical learning**, rather than attendance alone.

Important Distinction: Completion vs Attendance

For the website and certificate system, I recommend distinguishing:

Certificate of Completion — for a learner who satisfies the approved course requirements and assessment criteria. **Certificate of Attendance/Participation** — where Alpha wishes to recognise attendance at a workshop or short awareness session without certifying successful course competence. This distinction is particularly relevant if Alpha later provides training to teachers. Tanzania's Teachers' Professional Board regulations specifically address certification for recognised continuous professional development and state that accredited providers of such training provide certificates of attendance to registered teachers. Therefore, Alpha should not advertise its proposed teacher computer course as **officially recognised teacher CPD** unless the applicable accreditation/recognition requirements have been satisfied.

Certificate Governance

Before launching certification publicly, Alpha should formally approve:

Course → Curriculum → Duration → Trainer → Attendance Requirement → Assessment Method → Pass Requirement → Certificate Template → Authorised Signatories → Certificate Register → Verification Procedure

This is important because the previous sections include courses that are still proposed—such as Word, Excel, PowerPoint and coding. Alpha should not issue a completion certificate for a course until that course itself has been formally structured and approved.

Recommended Website Certificate Card

Certificate of Completion

Successfully complete an approved Alpha computer-training course and receive recognition of your achievement. Eligible participants may receive an **Alpha Computer Training Certificate of Completion** showing the course completed, training period and other approved completion information.

- ✓ **Complete the Course**
- ✓ **Complete Required Practical Activities**
- ✓ **Meet Approved Assessment Requirements**
- ✓ **Receive Your Certificate**

Certificate Provided Upon Successful Completion

[VIEW PROPOSED COURSES] [REGISTER INTEREST]

Important Website Note

Certificate availability depends on the approved course and successful completion of its requirements. Alpha-issued certificates confirm completion of the specified school training programme and should not be interpreted as nationally accredited academic or vocational qualifications unless explicitly stated otherwise.

That wording is important because formal technical and vocational awards in Tanzania operate within regulatory frameworks for curricula, assessment and certification.

Final Short Website Version

Computer Training Certificate

At **Alpha Adventist Pre & Primary School**, successful learning deserves recognition.

Participants who successfully complete an approved computer-training course may receive an **Alpha Computer Training Certificate of Completion**.

Certificates may record the **learner's name, course completed, training period, assessment result, unique certificate number, date of issue and authorized signatures**, together with the school's official identification and stamp. Our proposed certification process is designed to promote **participation, practical learning, assessment, accountability and recognition of achievement**. **Learn the Skills. Complete the Training. Demonstrate Your Ability. Receive Recognition. "CERTIFICATE PROVIDED UPON SUCCESSFUL COMPLETION"**

21. TRAINING ASSESSMENT

Practical Skills • Knowledge • Participation • Achievement

I reviewed Alpha's available academic, Board and ICT materials. The documents support an **activity-based and knowledge-check approach** to ICT learning: Alpha's ICT lessons include practical pair exercises, teacher-supervised activities, oral questions and smartboard-based "Quick Class Check" assessments. The school documents also formally include an **Academic Report** within Board governance. However, the exact weighting **40% + 30% + 20% + 10%** does **not appear as an approved Alpha assessment formula** in the documents reviewed. It is therefore suitable as a **proposed Computer Training Assessment Framework**, subject to school approval.

Proposed Computer Training Assessment Framework

Alpha's computer-training assessment should focus on whether learners can **demonstrate practical digital competence**, rather than relying only on written examinations.

Assessment Area	Proposed Weight	What It Measures
Practical Exercises	40%	Skills demonstrated throughout the course
Final Practical Test	30%	Independent performance of required computer tasks
Theory / Knowledge	20%	Understanding of concepts, terminology, safety and procedures
Attendance & Participation	10%	Consistent attendance, participation and engagement
TOTAL	100%	Overall course performance

Practical Exercises — 40%

This should form the largest component because computer competence is primarily demonstrated through **actual use of technology**. Depending on the course, learners could be assessed on tasks such as starting and shutting down a computer correctly, keyboard and mouse operation, creating and saving files, formatting documents, performing spreadsheet calculations, preparing presentations or applying safe internet practices. This aligns particularly well with Alpha's existing ICT approach, where learners work in pairs, identify devices and perform supervised practical activities.

Final Practical Test — 30%

At the end of an approved course, learners should complete an individual practical task appropriate to the course. For example, a **Computer Basics** learner might be asked to open a program, enter information, save a file in the correct location and close the computer safely. A future **Microsoft Word** learner might prepare and format a short document.

Theory / Knowledge — 20%

Theory should confirm that learners understand **why and how** digital tools are used. Alpha's existing ICT materials already demonstrate this form of assessment through short questions such as identifying input devices, explaining computer output and distinguishing hardware from software. Parts-of-a-computer lessons similarly use quick questions to test learners' understanding.

Attendance & Participation — 10%

Attendance and active participation should encourage learners to complete the full programme and engage with practical exercises. Attendance alone, however, should not be treated as proof of computer competence. Successful completion should depend principally on demonstrating the required learning outcomes.

Assessment Process

A professional workflow for Alpha would be:

Enrol → Attend Training → Complete Practical Exercises → Knowledge Checks → Final Practical Assessment → Calculate Result → Verify → Approve Completion → Issue Certificate

The school should approve the **pass mark, attendance requirement, reassessment rules and grading scale** before publishing them. These values are not established in the Alpha documents reviewed.

Website Message

Practical Learning. Fair Assessment. Recognised Achievement.

Participants in approved Alpha computer-training courses may be assessed through practical exercises, knowledge checks, participation and a final practical assessment. Assessment requirements will depend on the course and approved training framework.

22. COMPUTER TRAINING REGISTRATION

Choose Your Course. Register Your Interest. Build Your Digital Skills.

Alpha's Board documentation confirms that **registration** and **joining instructions** are formal areas of school administration. For computer training, however, the registration form below should be treated as a **new programme-specific registration mechanism**, rather than an existing Alpha admissions form. Because some of the proposed computer courses and the public/community programme have not yet been confirmed as operational, the website should use two different actions:

Current approved course: REGISTER NOW

Future/unlaunched course: REGISTER INTEREST / JOIN WAITING LIST

That distinction prevents the website from accepting what appears to be a confirmed enrolment for a programme that has not yet launched.

Online Computer Training Registration

Interested in developing practical digital skills?

Use the form below to register for an available Alpha computer-training course or express interest in an upcoming programme. Course availability, training schedule and admission will be confirmed by the school.

Recommended Registration Form

Personal Information

Full Name *

Enter your full name

Telephone Number *

e.g. +255 _____

Email Address

Enter your email address

Location *

Enter your area/town

Age Group *

Rather than requesting an unnecessary exact date of birth at this initial stage, the website can use appropriate age bands approved by the school.

Learner Category *

Select one: **Alpha Student • Alpha Teacher • Alpha Worker • Parent/Guardian • External Student • School Leaver/Job Seeker • Businessperson • Community Member • Other**

Preferred Course *

Select one: **Computer Basics • Microsoft Word • Microsoft Excel • Microsoft PowerPoint • Internet & Email • Digital Office Skills • Digital Safety • Introduction to Coding**

Only courses formally approved by Alpha should be displayed as **open for registration**. Others should carry a **Coming Soon** status.

Current Computer Knowledge *

Select one: **Beginner • Intermediate • Advanced**

The website could make this more useful by explaining the options: **Beginner** means little or no previous experience; **Intermediate** means the participant can perform common computer tasks independently; **Advanced** means the participant already has strong general computer skills and wants further development.

Preferred Training Time *

Select one: **Morning • Afternoon • Evening • Weekend**

This should be described as a **preference**, not a guaranteed timetable.

Additional Training Need — Optional

Tell us what computer skill you would most like to learn.

This small field can help Alpha understand demand before finalizing future courses.

Privacy & Consent

Because the registration form collects personal information—including names, telephone numbers, email addresses and participant categories—the website should provide a short privacy notice directly beside the submission button. A suitable website statement is:

Privacy Notice: Information submitted through this form will be used to process your computer-training registration or expression of interest, communicate programme information and administer the relevant training. Please provide only the information requested. Personal information will be handled in accordance with Alpha's approved privacy and information-management procedures. For children, the final implementation should include an appropriate **parent/guardian process** rather than treating a child's online submission exactly like an adult registration.

Confirmation Checkbox

Before submission:

I confirm that the information provided is correct and I have read the registration/privacy notice.

For public programmes that are still under development:

I understand that submitting this form expresses my interest and does not guarantee admission until Alpha confirms my place.

Recommended Registration Workflow

1. Submit Form → 2. Application/Interest Recorded → 3. Course Availability Checked → 4. Applicant Contacted → 5. Registration Confirmed → 6. Training Begins → 7.

Assessment → 8. Completion/Certificate where applicable

This workflow is better than immediately displaying “Registration Successful,” because submitting a website form should not automatically mean that a learner has been admitted.

Website Confirmation Message

After submission:

☐ **Thank You for Your Registration**

Your information has been received successfully. Alpha Adventist Pre & Primary School will review your selected course and contact you using the details provided regarding availability, schedule and the next registration steps.

For a Coming Soon course, change this to:

Thank You for Joining the Interest List

We have received your interest. You will be contacted when approved registration information for the selected programme becomes available.

Recommended Website Section

Ready to Build Your Digital Skills?

Whether you are an **Alpha pupil, teacher, school worker, parent or prospective community learner**, Alpha's developing computer-training programme aims to provide practical digital-learning opportunities appropriate to different levels of experience.

Choose your course. Tell us your current level. Select your preferred training period.

[REGISTER NOW]

For currently available and approved courses

[JOIN WAITING LIST]

For courses marked Coming Soon

Learn • Practise • Be Assessed • Achieve • Grow

Important website-development note

The **assessment percentages, external/community registration categories, proposed courses, training schedules and certification conditions are proposed structures**, not items I found formally approved in the Alpha documents. What the Alpha sources currently establish is the school's registration/academic governance structure and a practical ICT teaching approach using exercises, smartboard interaction and knowledge checks.

Keeping that distinction on the website will make the final Alpha site both **professional and factually defensible**.

23. ADMISSIONS PAGE

Join Alpha Adventist Pre & Primary School

A Place to Learn, Grow, Develop Character and Prepare for the Future

I reviewed the available Alpha documents and also checked public education records. There is solid evidence for an admissions page: Alpha's January 2026 School Board agenda specifically includes “**Registration 2025/2026**” and “**Join Instruction**”, showing that registration and joining procedures are established administrative functions of the school. Public government records also identify **Alpha Adventist Primary School, centre PS0603108**, in Kigoma and list its pupils in the official 2026 Form One selection process. Alpha's own documents show enrolment across **KG I, KG II and Standards I–VII**, including day and boarding categories. However, I did **not** find an Alpha document confirming that the school's existing admission process is exactly **Enquiry → Visit → Online Application → Assessment/Interview → Confirmation**. Therefore, that sequence is best presented as the **recommended website admissions workflow**, subject to management confirming the exact assessment, documentation and placement rules.

Welcome to Alpha Admissions

Choosing a school is an important decision for every family. At **Alpha Adventist Pre & Primary School**, we want parents and guardians to have a clear and supportive pathway when seeking admission for their children. Alpha provides education within a Seventh-day Adventist environment and seeks the harmonious development of learners academically, spiritually, physically and socially. The school serves learners from **pre-primary through primary education**, with Alpha's registration records showing KG I, KG II and Standards I–VII.

Start Your Child's Journey with Alpha

[APPLY / ENQUIRE ONLINE] [CALL ADMISSIONS]

[WHATSAPP ADMISSIONS] [BOOK A SCHOOL VISIT]

Our Recommended Admission Process

Step 1 — Make an Enquiry

Parents or guardians begin by contacting the school to enquire about admission, available classes, entry requirements, day or boarding arrangements where applicable, fees and other joining information. The website should make this first step easy through **telephone, WhatsApp or an online enquiry form.**

Step 2 — Visit the School

Families should be encouraged to visit Alpha and speak directly with the appropriate school office. A school visit gives parents an opportunity to understand Alpha's educational environment, ask questions about learning and school life and obtain current information directly from school management.

[BOOK A SCHOOL VISIT]

Step 3 — Complete the Application / Registration Process

Parents or guardians should complete the school's approved application or registration process and provide only the documentation officially required for the relevant class.

Because Alpha's Board documentation specifically distinguishes **Registration** from **Joining Instruction**, the website should ideally make both available as separate resources once management approves their online publication.

[START APPLICATION] [VIEW JOINING INFORMATION]

Step 4 — Assessment / Interview Where Applicable

Where required by Alpha's approved admission procedures, the child may undertake an age-appropriate assessment, interview or placement exercise. The purpose should be described as helping the school understand the learner's educational readiness and appropriate placement—not as a guaranteed universal requirement unless management confirms that it applies to every applicant.

Step 5 — Admission Decision & Confirmation □

After the application, required documents and any applicable assessment have been reviewed, the school communicates the admission outcome to the parent or guardian. Successful applicants should then receive the appropriate **joining instructions**, including the current requirements for reporting to school.

Recommended workflow

Enquire → Visit Alpha → Apply → Assessment/Placement Where Applicable → Admission Confirmation → Joining Instructions → Report to School

Levels of Entry

Based on Alpha's internal registration records, the website can confidently present admissions across:

Pre-Primary: KG I • KG II

Primary: Standard I • Standard II • Standard III • Standard IV • Standard V • Standard VI • Standard VII

Alpha's records also contain **day and boarding enrolment categories**. Before putting a universal “**Boarding Available**” banner on the website, however, management should confirm which current classes are accepting boarders and current capacity.

Contact Admissions

Alpha's 2026 official Graduation Programme gives the school's address as:

Alpha Adventist Pre & Primary School

P.O. Box 891, Kigoma – Tanzania

Tel: +255 613 807 200 / +255 747 128 120

Another Alpha document identifies the Head of School's Office with the same telephone contacts and lists **alphaadventistschool@yahoo.com** as an email address. Before website launch, Alpha should confirm which telephone number will serve as the dedicated **Admissions/WhatsApp line** and whether that email remains the official public admissions email.

Main Admissions Buttons

[**APPLY ONLINE**]

[**CALL ADMISSIONS**]

[**WHATSAPP ADMISSIONS**]

[**BOOK A SCHOOL VISIT**]

For accuracy, **Apply Online** should not be activated until there is an approved online admissions workflow and privacy notice.

24. WHY CHOOSE ALPHA?

Education That Develops the Whole Child

This section should be particularly strong visually, but every claim should remain defensible. Alpha's documented philosophy explicitly focuses on “**Wholistic education for harmonious development of the Physical, Mental, Social and Spiritual dimensions of life.**” That provides an excellent foundation for the entire “Why Alpha?” section.

There is also contemporary public evidence of Alpha's academic activity: Tanzania's official 2026 Form One selection records identify pupils from Alpha Adventist Primary School (PS0603108). A public Adventist institutional history also identifies Alpha Primary School as an institution operated by the Western Tanzania Conference and describes a history of strong academic performance.

I recommend changing the original generic checklist into the following **evidence-based website cards**.

Quality-Focused Education

Building Strong Academic Foundations

Alpha places academic development at the centre of school life. Its governance structure includes formal academic reporting, timetables, daily routines and monitoring of school programmes.

The website should focus on **continuous academic improvement and learner development** rather than making an unsupported claim such as “the best school.”

Christian Education & Spiritual Development

Faith Integrated with Learning

As a Seventh-day Adventist school, Alpha's educational identity includes spiritual development alongside academic learning.

Alpha's philosophy explicitly addresses the **physical, mental, social and spiritual dimensions** of development.

Character, Responsibility & Discipline

Education beyond the Classroom

Alpha's approach should present discipline as part of **character formation, responsibility, respect and positive behaviour**, rather than discipline based only on punishment.

The school's teacher guidance also calls for prayer, appropriate conduct, teacher role-modelling and respectful relationships with learners.

Computer & Digital Learning

Preparing Learners for a Digital Future

Alpha has documented ICT learning materials and an identified **Computer Lab**. Its 2026 Graduation Programme includes a special activity in the Computer Lab.

Existing Alpha ICT materials support practical learning in computer fundamentals, hardware/software, keyboard and mouse use, computer safety and smartboard-assisted learning.

Learner-Centred Teaching

Helping Learners Think, Discover and Create

This is one of the strongest claims supported by Alpha's own staff documentation.

Subject teachers are directed to use approaches involving learners actively in the learning process, including **group discussions, teaching aids, assignments, question-and-answer methods, research and group work**. The document says learners should be encouraged to become **generators of knowledge, discoverers, creators and thinkers**.

That is excellent authentic website content.

Continuous Academic Monitoring

Understanding Learner Progress

Alpha's teacher responsibilities include frequent exercises and quizzes to examine learners' understanding, alongside academic reporting within school governance.

The website can therefore confidently describe **continuous academic monitoring**, although it should not imply that parents currently have a live online results portal unless such a system exists.

Creativity & Practical Learning

Learning Through Participation

Alpha's teacher guidance explicitly encourages imagination, creativity, inquiry, group work, research and active learner participation.

This makes **Creativity and Practical Learning** a much stronger evidence-based card than a vague marketing statement.

Physical & Talent Development

Developing the Whole Learner

Physical development is explicitly included in Alpha's educational philosophy. The school's graduation activities also document choir, Pathfinder and academic exhibitions, showing that school life includes activities beyond ordinary classroom instruction.

I would therefore combine your original **Talent Development** and **Sports** claims under a broader **Physical & Talent Development** card unless Alpha supplies a current sports programme listing.

Leadership & Responsibility

Preparing Learners for Life

Leadership development can be presented carefully as part of Alpha's broader character-building objective, participation and responsibility.

For the website, avoid claiming a formal **Leadership Development Programme** unless Alpha has one. A safer phrase is:

We encourage responsibility, participation, confidence and positive character as learners grow academically and socially.

School–Family Connection

Parents as Partners in Education

Alpha's 2026 programme is specifically prepared for **Parents & Guardians** and includes parents among invited participants in major school activities.

This supports a genuine **school–family relationship**. However, “regular parent communication” should only be advertised if Alpha confirms its actual channels and frequency.

Structured School Environment

Learning Supported by Organisation and Accountability

Alpha's Board agenda demonstrates structured governance covering academic reports, registration, joining instructions, school calendars, daily routines, timetables, finance and human resources. This is more defensible than simply advertising a “safe environment.” If Alpha wants to make a specific **child-safety/security** claim, its current safeguarding, security and supervision measures should first be documented.

Recommended “Why Alpha?” Website Block

Why Choose Alpha Adventist Pre & Primary School?

More Than Academic Learning — Education for the Whole Child

At Alpha Adventist Pre & Primary School, education is approached as the development of the **whole learner**. Our educational philosophy recognises the importance of harmonious **physical, mental, social and spiritual development**.

Through academic learning, Christian values, ICT exposure, learner-centred teaching, practical activities and opportunities for participation, Alpha seeks to help children develop the knowledge, character, confidence and skills required for their next stage of education and life.

Discover Alpha. Visit Our School. Meet Our Team.

[APPLY FOR ADMISSION] [BOOK A SCHOOL VISIT]

One particularly useful external verification for the final website is that the Tanzanian government selection system identifies the school as **Alpha Adventist Primary School, centre PS0603108**. I would use that verified identifier in the site's institutional/profile section, while keeping the public-facing name from Alpha's own current documents as **Alpha Adventist Pre & Primary School**.

25. SCHOOL LIFE

Learning, Faith, Friendship and Discovery

School life at **Alpha Adventist Pre & Primary School** should be presented as extending beyond ordinary classroom instruction. Alpha's documented activities include **Pathfinder participation, academic exhibitions, choir performances, graduation activities, special worship services and computer-lab activities**.

This fits the wider Adventist philosophy of developing learners intellectually, physically, socially and spiritually. The General Conference Education Department similarly describes

mental, physical, social and spiritual development as central to Adventist educational philosophy.

Spiritual Life

Growing in Faith and Character

Spiritual development is one of the strongest documented aspects of Alpha school life. The School Board agenda specifically identifies **Special Worship Services** and **School Choir Programmes**.

The website can feature worship activities, prayer, Bible-based learning, Christian values, service and character formation.

Music & Choir

Expressing Faith and Talent Through Music

Music is directly supported by Alpha documentation. The 2026 Graduation Programme includes several **Choir/Special Item** performances, while the Board agenda specifically includes school choir programmes.

This card can therefore confidently be called **Music & Choir**.

Pathfinder & Character Activities

Learning Responsibility, Service and Teamwork

Pathfinder participation is documented in Alpha's official graduation activities, including academic exhibits and programme participation.

A dedicated Pathfinder card would actually be more authentic to Alpha than some of the generic activities originally proposed.

ICT & Digital Learning

Building Confidence with Technology

Alpha has actual Primary ICT learning materials covering computer fundamentals and practical technology use. The materials explicitly describe lessons as “**Clear • Simple • Practical**” and use smartboard-supported instruction.

Alpha's official graduation programme also documents an activity in the **Computer Lab**.

Academic & Practical Activities

Learning by Thinking, Doing and Participating

Alpha's graduation programme includes **Academic Exhibits**, demonstrating opportunities to showcase learning outside conventional lessons.

The website can use this area for academic projects, exhibitions, quizzes, demonstrations and classroom activities.

Creativity & Talent

This is suitable as a broader developmental area, but individual claims such as **painting, crafts, drama and poetry** should only be listed as current programmes after Alpha confirms them.

Physical Activities & Sports

Alpha's educational philosophy supports physical development, but the files reviewed here do not provide enough detail to advertise particular sports teams, competitions or facilities. The website should publish the specific sports actually offered once management confirms them.

Environment & Responsibility

Environmental responsibility is educationally appropriate and Adventist education resources include environmental care among their educational resources. However, I have not found a documented Alpha environmental club or programme, so this should not yet be described as an established Alpha activity.

Recommended School Life Cards

☐ Spiritual Life | ☐ Music & Choir | ☐ Pathfinder | ☐ ICT & Digital Learning | ☐ Academic Exhibitions | ☐ Creativity & Talent | ☐ Physical Development | ☐ Service & Responsibility

26. ALPHA COMPUTER CLUB

Explore • Create • Solve • Innovate

This is a strong future idea, but the distinction is important:

I did not find evidence in the Alpha documents reviewed that a formally constituted “Alpha Computer Club” currently exists.

What is documented is an existing ICT-learning foundation: Primary ICT lessons, smartboard-supported activities, computer safety instruction and use of a Computer Lab.

Therefore, I recommend the website initially label this:

Proposed Alpha Computer Club — Coming Soon

The proposed club could provide interested pupils with opportunities to explore technology beyond regular computer lessons through **typing challenges, computer quizzes, digital drawing, presentations, digital storytelling, cyber-safety activities, technology projects, introductory coding and innovation challenges.**

A future progression could be:

Learn → Practise → Explore → Create → Compete → Present → Innovate

Coding, Scratch and programming competitions should remain **future activities** until curriculum, supervision and resources are approved.

[LEARN MORE] [COMING SOON]

27. TALENT & INNOVATION ☐

Every Child Has Potential

This section fits Alpha particularly well when connected to its holistic educational philosophy rather than simply listing activities.

Alpha's documented graduation programme demonstrates **choir performances, Pathfinder involvement and academic exhibits**, providing genuine material for showcasing pupil participation and achievement.

Recommended Website Message

At Alpha, education should provide opportunities for children to **discover, develop and responsibly express their abilities.**

Our Talent & Innovation section celebrates pupil participation, creativity, academic work and developing abilities across school life.

Verified or supportable showcase categories include:

- ☐ **Music & Choir**
- ☐ **Pathfinder Activities**
- ☐ **Academic Exhibitions**
- ☐ **ICT Learning**
- ☐ **Pupil Achievement**

Additional categories such as **Drama, Poetry, Art, Sports, Public Speaking, Coding, Leadership Projects and Innovation Challenges** should be added as Alpha confirms active programmes in those areas.

Real Work. Real Learners. Real Achievement.

Where possible, use **actual pupil projects, school-created materials and approved photographs** rather than stock photographs.

For children, Alpha should have an appropriate approval/consent process before publicly publishing identifiable photographs, videos, names or pupil work.

28. PARENT CORNER

Keeping Alpha Families Informed and Connected

This is one of the most valuable sections to include.

Alpha already has documentary evidence of structured parent involvement: its 2026 programme is specifically identified as a “**Graduation Weekend Programme – Parents & Guardians,**” and parents are explicitly included among participants and guests.

The School Board documentation also includes **School Calendar, Daily Routine and Timetable** as formal governance items.

Parent Corner should provide:

- ☐ **School Calendar** — term dates and approved school events.
- ☐ **Announcements** — important official notices.
- ☐ **Examination Information** — approved assessment/examination schedules.
- ☐ **Academic Information** — homework or learning guidance where the school decides to publish it.
- ☐ **Parent Meetings** — dates, notices and relevant information.
- ☐ **School Rules & Joining Information** — approved parent/pupil guidance.
- ☐ **Fee Information** — only current, management-approved fee schedules; sensitive individual account information must never be public.
- ☐ **Policies & Downloads** — only documents approved for public distribution.
- ☐ **Computer Training Notices** — registration announcements once programmes are approved.
-  ☐ **Contact the School** — clear official contact channels.

Future Secure Parent Portal

A later authenticated portal could provide individual families with:

Student Results • Attendance • Fee Statements • Academic Reports • Notices • Messages • Teacher Communication

These are **future system capabilities**, not features established in the supplied documents. Because they involve children's records and financial/personal information, they should be accessible only through secure authentication and role-based access—not through public website pages.

29. STUDENT CORNER

ALPHA KIDS ZONE

Learn • Explore • Practise • Create

This can become one of the most engaging parts of the website.

Alpha already has ICT materials specifically designed to be child-friendly, practical and interactive. The lessons use smartboard presentations and practical computer activities.

Recommended Kids Zone

☐ **Computer Lessons**

Revision materials based on Alpha's approved ICT lessons.

☐ **Typing Practice**

Age-appropriate keyboard activities.

☐ **Reading Corner**

Approved reading resources and language activities.

☐ **Mathematics Activities**

Simple curriculum-aligned practice.

☐ **Science Discovery**

Safe educational science resources and activities.

☐ **Quizzes & Challenges**

Teacher-approved academic quizzes.

☐ **Creative Activities**

Drawing, projects and creativity exercises.

☐ ☐ **Internet Safety**

Child-friendly guidance on passwords, websites, online communication and responsible computer use.

☐ **Educational Games**

Only carefully reviewed, age-appropriate educational resources.

Child-Safe Design Principle

The Kids Zone should be **simple, colourful, advertisement-light or advertisement-free, age-appropriate and curated by Alpha.**

Avoid unrestricted external links, open chatrooms, uncontrolled user-generated content and unnecessary collection of children's personal information.

30. NEWS & EVENTS

What's Happening at Alpha

Alpha has genuine events that can populate this section immediately. Its official 2026 materials document the **9th Graduation Ceremony, Computer Lab special activity, Academic Exhibits, Choir performances, Pathfinder participation and Certification/Award activities.**

The Board also identifies special worship services and school choir programmes among important occasions.

Strong initial news categories

☐ **Graduation & Recognition**

☐ **Worship & Spiritual Activities**

☐ **Choir & Music**

☐ ☐ **Pathfinder Activities**

☐ **Academic Exhibitions & Achievement**

☐ **ICT & Computer Learning**

☐ ☐ ☐ **Parent & School Community Activities**

Events such as **ICT Week, Sports Day and Talent Day** should only be advertised when actually scheduled.

News Card Format

PHOTO

Event/Story Title

Date

Short Description

[READ MORE]

Every article should have a publication date so parents can distinguish current information from archived news.

31. SCHOOL CALENDAR

Stay Informed. Plan Ahead.

A School Calendar is strongly supported by Alpha's governance documents: the School Board agenda specifically includes the **School Calendar**, alongside Daily Routine and Timetable.

The online calendar can publish approved dates for:

School Opening • Assessments/Examinations • Parent Meetings • Academic Activities • Worship Programmes • Graduation • School Closing • Approved Sports/Co-curricular Events • Computer Training Sessions

Computer-training sessions should appear only after those programmes and dates have been approved.

Useful filters

All Events | Academic | Parents | Spiritual | ICT | Co-curricular | Holidays

Buttons

[VIEW FULL CALENDAR]

[DOWNLOAD SCHOOL CALENDAR]

The downloadable PDF and website calendar should be generated from the **same approved calendar version** to prevent conflicting dates.

32. GALLERY

Life at Alpha in Pictures

Alpha's gallery should tell the school's story visually rather than becoming an unstructured collection of photographs.

Recommended categories are:

All | Campus | Learning & Classrooms | Pupils | Computer Lab & ICT | Teachers & Staff | Graduation | Music & Choir | Pathfinder | Academic Exhibitions | Talents & Activities | Events

Add **Sports** and **ICT Projects** once there is sufficient approved material representing those programmes. The graduation programme already establishes several excellent gallery opportunities: Computer Lab activity, ceremonial marching, academic exhibits, choir performances, certification and official photographs. Use high-quality real photographs, sensible captions and dates. Avoid publishing children's full personal details with photographs unless specifically appropriate and authorised.

33. VIDEO GALLERY

Experience Alpha

A Video Gallery can make the school website much more engaging, particularly for prospective families. Recommended approved video categories:

- ☐ **Discover Alpha** — school introduction and campus presentation.
- ☐ **Graduation** — official ceremony highlights.
- ☐ **Music & Choir** — approved performances.
- ☐ **Pathfinder** — approved activities.
- ☐ **ICT Learning** — supervised Computer Lab and learning activities.
- ☐ **Academic Activities** — projects, exhibitions and demonstrations.
- ☐ **Spiritual Life** — appropriate worship and school spiritual activities.
- ☐ **Sports & Physical Activities** — once confirmed and filmed.

Videos may be embedded from official school-controlled channels on [YouTube](#), [Instagram](#) or [Facebook](#).

Only videos approved for public communication should be embedded. For pupils, publication approval is especially important. I would also avoid automatically embedding unrelated recommended videos from those platforms. The page should display **Alpha-approved content only**.

34. TESTIMONIALS ♥□

What Our School Community Says

Testimonials can strengthen the website, but they must be genuine.

I did **not find verified parent quotations in the Alpha documents reviewed that support publishing the two sample statements as real testimonials**. Therefore, the example quotes in your draft should **not** be published under “— Parent” as though a real parent said them.

Instead, build a controlled testimonial section after collecting approved statements.

Recommended format

“[Exact approved testimonial from parent or guardian.]”

— Parent/Guardian

Class/relationship shown only where appropriate and consented

The school could collect testimonials around themes such as:

Academic development • Christian education • Child development • Teacher support • School communication • ICT learning • Character development • Overall school experience

Website Introduction

Every family experiences Alpha in a different way. Here we share selected feedback from parents and guardians about their children's learning and school experience. Testimonials are published with appropriate permission.

Recommended Website Architecture for Sections 25–34

Rather than putting ten long pages into the navigation menu, I recommend organising them under four clear areas:

Main Menu	Subsections
School Life	Spiritual Life, Choir, Pathfinder, Activities, Talent & Innovation, Computer Club
Students & Parents	Alpha Kids Zone, Parent Corner
News & Events	News, Events, School Calendar
Media	Photo Gallery, Video Gallery, Testimonials

This will make the website much easier to navigate on both mobile phones and computers.

Important accuracy classification

Documented now: Computer Lab/ICT learning, smartboard-supported ICT, Choir, Pathfinder participation, Academic Exhibits, Graduation/Certification activities, special worship services, School Calendar governance and parent participation.

Suitable but needs Alpha confirmation before advertising as current: specific sports programmes, art/crafts, drama, poetry, formal public speaking programme, environmental activities, Talent Day, Sports Day and ICT Week.

Clearly future/proposed: formal **Alpha Computer Club**, coding competitions, innovation challenges, public computer-training events and secure Parent Portal. That separation will give Alpha a website that is attractive □ while remaining faithful to what the school's own records currently support.

35. TEACHERS & STAFF

Meet the People Who Support Learning at Alpha

The Teachers & Staff page should communicate professionalism, Christian service, academic responsibility and teamwork.

Alpha's current records identify formal leadership positions. The 2025 financial statements name **CHRISTOPHER Mashaka James — Head of School, CHAMPANDA Sara — Deputy Head of School**. Because personnel can change, names and photographs should be verified immediately before website publication.

Recommended staff structure

The public page can be organised into **School Leadership • Academic Team • Pre-Primary Teachers • Primary Teachers • ICT/Digital Learning • Chaplaincy/Spiritual Life • Administration & Finance • Support Staff**.

Each profile should contain only:

Approved Photograph | Full Name | Official Position | Department/Responsibility

Do not publish private telephone numbers, residential addresses, identity numbers, personal email addresses, family information, certificates or other unnecessary personal information.

A suitable introduction is:

Our Teachers & Staff

Alpha Adventist Pre & Primary School is supported by educators, administrators and support personnel who contribute to the academic, spiritual, social and practical development of our learners. Together, our team works to provide an organised, supportive and values-based learning environment.

36. CONTACT PAGE

Contact Alpha Adventist Pre & Primary School

This section can now use real Alpha information rather than placeholders.

Alpha's official 2026 Graduation Programme gives:

Alpha Adventist Pre & Primary School

P.O. Box 891, Kigoma – Tanzania

Telephone: +255 613 807 200 / +255 747 128 120

The school's public history places Alpha in the **Msimba area of Kigoma**.

Recommended Contact Block

☐ Location

Msimba area, Kigoma, Tanzania

☐ Postal Address

P.O. Box 891, Kigoma – Tanzania

Telephone

+255 613 807 200

+255 747 128 120

☐ WhatsApp

Use only the number management officially designates for WhatsApp.

☐ Email

Alpha documents previously identify **alphaadventistschool@yahoo.com**; management should reconfirm it before launch.

☐ Official Website

Use the new website domain after it is registered and approved. Do **not** use the unrelated “Alpha Schools” website found online.

□ Office Hours

Publish only after management confirms official office hours.

[CALL SCHOOL] [WHATSAPP] [GET DIRECTIONS] [SEND ENQUIRY]

For the map, use the school's **verified physical map pin**, rather than merely centring a map on Kigoma.

37. CONTACT FORM

How Can We Help You?

The contact form should be short and purposeful.

Recommended fields are **Full Name • Telephone • Email (optional where appropriate) •**

Enquiry Category • Subject • Message.

Suggested categories are **Admissions • Parent/Guardian Support • Academic Information • Computer & Digital Learning • Computer Training • Partnership/Collaboration • General Enquiry.**

[SEND MESSAGE]

After submission:

Thank you for contacting Alpha Adventist Pre & Primary School. Your enquiry has been received and will be directed to the appropriate school office.

Add a concise privacy notice explaining why contact information is being collected and how it will be used.

38. SOCIAL MEDIA INTEGRATION

One School. One Message. Connected Channels.

The website should be Alpha's **authoritative digital information source**, while approved social-media accounts distribute news and direct audiences back to the website.

Do not link to Facebook, Instagram or YouTube accounts until management verifies that they are **official Alpha-controlled accounts**.

Recommended channel roles are:

Facebook — parent/community announcements, events, admissions notices, achievements and longer updates.

Instagram — approved photographs, short videos, school life, ICT activities, choir, Pathfinder, academic exhibitions and pupil activities.

YouTube — school introduction, graduation highlights, educational content, school tours, choir/talent performances and approved ICT demonstrations.

The operational model should be:

Alpha Website → Official Information

Social Media → Promotion & Engagement

Website → Detailed/Authoritative Information

39. SOCIAL MEDIA CONTENT PLAN

Consistent, Useful and Responsible Communication

Rather than requiring staff to post simply because it is a particular weekday, Alpha should use a flexible editorial calendar. A practical weekly rhythm is:

Day	Content Theme
Monday	Academic Learning / Week Ahead
Tuesday	Teacher, Classroom or Learning Method
Wednesday	ICT / Computer & Digital Learning

Thursday	Choir, Pathfinder, Creativity, Sport or Pupil Activity
Friday	Weekly Highlights / Values / Achievement
Special Events	Timely approved photos, notices and short videos

Every pupil-related post should go through a simple process:

Create → Verify Facts → Check Image/Video Approval → Management Approval Where Required → Publish → Archive

40. HOMEPAGE STRUCTURE

Your proposed homepage is comprehensive, but it is **too long if every item becomes a full section**. A homepage should introduce the institution and route users to detailed pages.

I recommend this streamlined structure:

Top Contact Bar → Navigation → Hero → Welcome to Alpha → Key Features → About Alpha → Academics → Faith & Character → Computer & Digital Learning → Why Alpha → School Life & Talents → News & Upcoming Events → Admissions CTA → Gallery → Parent/Student Quick Links → Computer Training CTA → Contact → Footer

Teacher/worker training, certificate details, course assessment and registration should live under a dedicated **Computer Training** section rather than occupying several large homepage sections. This will make the homepage considerably faster and easier to use.

41. VISUAL DESIGN

Professional for Parents. Engaging for Children. Identifiably Alpha.

The final visual system should be derived from the **official Alpha logo and approved institutional identity**, not invented independently.

Your proposed Deep Blue + Green + Gold/Yellow combination can work as a design concept, but I have not established from Alpha's source documents that these are its formally approved brand colours.

Recommended principles:

Primary Colour: derived from official logo

Secondary Colour: complementary institutional colour

Accent: limited highlight colour

Background: white/light neutral

Headings: modern, highly legible sans-serif

Body: highly readable sans-serif

Buttons: prominent with clear labels

Photography: genuine approved Alpha photography

Layout: spacious, structured and uncluttered

Animation: subtle and purposeful

Accessibility: adequate contrast, keyboard usability and readable text

Responsive Design: desktop, tablet and mobile

Avoid excessive animation, flashing banners and too many colours.

42. DESIGN FOR CHILDREN

The **Alpha Kids Zone** can have a more playful visual treatment while remaining unmistakably part of Alpha. Use **large illustrations/photos, friendly icons, short instructions, colourful cards, simple navigation, quizzes, teacher-approved activities and practical ICT content**.

Alpha's existing ICT materials already demonstrate this approach: lessons use simple language, smartboard interaction and practical activities.

The children's interface should prioritise:

See → Understand → Click → Learn → Practise

Avoid advertising, uncontrolled external links, open public chat and unnecessary requests for children's personal information.

43. DESIGN FOR PARENTS

The parent experience should be task-oriented.

Parents should be able to reach **Admissions • Academic Programmes • Calendar • Announcements • Fees Information • Joining Information • Contact • Policies/Downloads • Events • Computer Training** within one or two interactions.

Future individual results, attendance and financial records belong behind authentication—not in the public Parent Corner.

A useful parent dashboard design would show:

Latest Announcement | Next Important Date | Admissions | Calendar | Downloads | Contact School

44. MOBILE-FIRST DESIGN

Designed for the Screen Parents Carry Every Day

The website should be developed mobile-first rather than designing desktop pages and shrinking them later. Priorities are **fast loading, compressed images, readable typography, touch-friendly buttons, simplified menus, responsive forms and minimal pop-ups**.

On mobile, three high-value actions can remain readily accessible:

☐ **WhatsApp** |  **Call** | ☐ **Apply/Admissions**

However, sticky controls should not cover page content or interfere with accessibility.

45. WEBSITE SAFETY, CHILD PROTECTION & PRIVACY

This should be a **mandatory architecture requirement**, not merely a footer statement.

Alpha's own ICT lessons already teach pupils safe computer behaviour and online protection.

The website should apply the same principle institutionally.

Controls should include **HTTPS/TLS, strong administrator authentication, MFA where supported, role-based access, backups, anti-spam controls, software updates, secure forms, audit logging, privacy notices, controlled media publication and appropriate parent/guardian authorisation processes**.

Never publicly expose **individual pupil results, attendance histories, fee balances, medical information, contact details, home addresses, authentication credentials or private school records**. Computer-training registrations should also be protected because they contain identifiable information.

46. WEBSITE ADMINISTRATION

Alpha should not need a programmer whenever it wants to publish an announcement.

The CMS should allow authorised personnel to manage **News • Events • Calendar • Gallery • Admissions Information • Downloads • ICT/Computer Training • Courses • Certificates • Parent Notices • Staff Profiles • Contact Information • Social Links**.

Use role separation such as:

Super Administrator → ICT/Web Administrator → School Management Approver → Content Editor → Admissions Editor → Academic Editor

A content editor should not automatically receive permission to change system settings or administrator accounts.

47. SEARCH ENGINE OPTIMISATION

SEO should begin with Alpha's **real institutional identity**.

Tanzania's government records identify the school as **Alpha Adventist Primary School, centre PS0603108**. Public Adventist history also places the school in the Msimba/Kigoma area.

Core search themes can therefore include:

Alpha Adventist Pre & Primary School • Alpha Adventist Primary School Kigoma • Pre-primary school Kigoma • Primary school Kigoma • Adventist school Kigoma • Christian education Kigoma • ICT learning Kigoma Use “**Computer training Kigoma**” only when the public programme actually launches. Every page should have a unique title, meta description, clean URL, meaningful heading structure and useful image alt text. Add appropriate school/organization structured data and maintain an XML sitemap.

48. FOOTER DESIGN

I recommend replacing the proposed unofficial slogan with Alpha's documented motto:

ALPHA ADVENTIST PRE & PRIMARY SCHOOL

“Wisdom in Truth”

A historic Alpha public profile also documents the motto “**Wisdom in Truth.**”

Then structure the footer around:

Quick Links: About • Academics • Admissions • ICT • Gallery • Contact

Parents: Calendar • Announcements • Downloads • Policies

Students: Kids Zone • ICT Lessons • Learning Resources

Follow Alpha: verified official social accounts only

Contact: P.O. Box 891, Kigoma • +255 613 807 200 • +255 747 128 120

© [Current Year] **Alpha Adventist Pre & Primary School. All Rights Reserved.**

Your phrase “**Education • Faith • Technology • Talent • Character • Future**” is attractive, but it is a proposed marketing line—not an official Alpha motto found in the reviewed records.

49. MAIN COMPUTER TRAINING BANNER

This banner needs a factual correction. Alpha's documents verify **Primary ICT education and a Computer Lab**, but do not establish all of the proposed adult/community courses as currently operating.

Use: **COMPUTER & DIGITAL LEARNING AT ALPHA**

Building Practical Digital Skills for Learning and the Future

CURRENT FOUNDATION

Primary ICT • Computer Fundamentals • Computer Safety • Practical Computer Use

PROGRAMME DEVELOPMENT

Expanded digital-skills training for staff and selected groups

COMING SOON — SUBJECT TO APPROVAL

Community Computer Training

Future proposed courses: Computer Basics • Word • Excel • PowerPoint • Internet & Email •

Digital Office Skills • Digital Safety • Introductory Coding

[EXPLORE ICT AT ALPHA] [REGISTER INTEREST IN FUTURE TRAINING]

Do not display “**Certificate Provided**” until the certificate framework and qualifying courses are formally approved.

50. MAIN ADMISSIONS CTA

A stronger evidence-safe version is:

Give Your Child a Strong Foundation for Learning and Life

Academic Development • Christian Education • Character Formation • Practical Learning • Digital Skills

Discover an educational environment committed to the harmonious development of the learner.

[ENQUIRE ABOUT ADMISSION] [BOOK A SCHOOL VISIT] [CONTACT THE SCHOOL]

I prefer “**Enquire About Admission**” over “Apply Now” until the online application process is actually operational.

51. FUTURE DIGITAL DEVELOPMENT

The website architecture should anticipate future modules without presenting them as current services.

A sensible roadmap is:

Phase 1 — Public Website: institutional information, academics, admissions enquiries, news, calendar, gallery, ICT pages and contact.

Phase 2 — Digital Services: online applications, document workflows, certificate register/verification and structured computer-training registration.

Phase 3 — Secure Portals: Parent Portal, Student Portal, Teacher Portal, results, attendance, reports and authorised fee information.

Phase 4 — Learning Services: LMS, e-learning, online library and approved online courses.

Phase 5 — Integrated School Services: approved online payments, transport information/tracking and mobile application. A future **Alpha Digital Learning & Training Centre** could eventually explore Graphic Design, Web Development, Programming, Networking, Computer Maintenance, AI Awareness, Digital Marketing, Cybersecurity, Data Protection and Digital Entrepreneurship—but these are **future concepts**, not current Alpha programmes.

52. OFFICIAL WEBSITE POSITIONING

This section needs careful wording so the website does not claim institutional functions that do not yet exist.

A Pre-Primary & Primary School

Providing structured education from the early years through primary level.

A Seventh-day Adventist Educational Institution

Integrating education with Christian faith, character and spiritual development. Alpha's Adventist institutional history is independently documented.

A School Developing Digital Literacy

This is more accurate than immediately calling Alpha a “Digital Learning School.” Alpha already has documented Primary ICT lessons and Computer Lab activities.

A School Supporting Whole-Person Development

Academic exhibitions, Pathfinder participation, choir and other documented activities demonstrate learning beyond conventional classroom instruction.

A Future Community Digital-Skills Contributor

Use this only as a strategic direction until community training is formally approved.

53. WHY THIS WEBSITE ARCHITECTURE IS JUSTIFIED

The architecture works because it serves four audiences simultaneously—**prospective families, existing parents, pupils and the wider school community**—without forcing them through the same user journey. For children, it provides visual and interactive learning. For parents, it prioritises admissions, academics, calendars, notices and communication. For management, it creates a controlled publishing platform. For ICT development, it establishes an expandable foundation for future digital services. Most importantly, the architecture distinguishes **public information from private records**. Results, attendance, fees and individual communications can later sit behind authenticated portals, while institutional information remains public. It also gives Alpha one authoritative digital identity. Social media becomes the distribution layer; the website remains the institutional reference point.

54. RECOMMENDED FINAL HOMEPAGE MESSAGE

The proposed wording is attractive, but I recommend aligning the main message more closely with Alpha's documented institutional language.

Welcome to Alpha Adventist Pre & Primary School

Wisdom in Truth

Nurturing learners through education, faith, character and practical learning.

At **Alpha Adventist Pre & Primary School**, we seek to provide an educational experience that supports the harmonious development of the learner academically, physically, socially and spiritually. As a Seventh-day Adventist educational institution in Kigoma, Alpha combines **academic learning, Christian values, character development and growing opportunities for practical digital learning**. Our aim is to help learners develop knowledge, responsibility, confidence and skills that prepare them for further education and life. Alpha's ICT materials already demonstrate a practical approach to computer education through computer fundamentals, smartboard-supported learning, computer-lab safety and hands-on activities.

Learn with Purpose. Grow in Character. Prepare for the Future.

[ICT [EXPLORE ACADEMICS] [ADMISSIONS] [DISCOVER ALPHA] & DIGITAL LEARNING]

Final accuracy classification for the developer

For the website build, I would mark content internally as **VERIFIED, MANAGEMENT CONFIRMATION REQUIRED**, or **FUTURE/PROPOSED**. Verified items include the Alpha identity, Kigoma location/contact numbers, Adventist affiliation, leadership roles found in current records, Primary ICT/Computer Lab activity and documented graduation/academic activities. Items requiring confirmation include **official email, WhatsApp number, precise map pin, office hours, current staff roster/photos, official social-media accounts, logo colour specifications and detailed admissions workflow**. Future items include **community computer training, formal adult ICT courses, Computer Club, certificate programme, Parent/Student portals, LMS, online payments, transport tracking and mobile app**. That distinction is important: it allows Alpha's website to look ambitious and modern without presenting future plans as services that already exist.
